

L&I Selected PDL

Status	TCC	Therapeutic class description	Preferred drug(s)
A	B6M	Inhaled corticosteroids	Beclomethasone dipropionate MDI (Qvar RediHaler) Budesonide nebulizer suspension (generics only) Fluticasone propionate MDI/DPI (Flovent Diskus/HFA)
A	B6W	Beta adrenergic agents, orally inhaled, short-acting	Albuterol sulfate solution (generics only) Albuterol sulfate (ProAir HFA)
PA	B6Y	Beta adrenergic agents, orally inhaled, long-acting	Salmeterol (Serevent Diskus) - when asthma or COPD accepted
	B6Z	Beta adrenergic agents, orally inhaled, ultra long-acting	
PA	B61	Anticholinergics, quaternary ammonium, orally inhaled, long-acting	Tiotropium bromide monohydrate (Spiriva Handihaler/Respimat) - when COPD accepted
PA	B62	Beta adrenergics & anticholinergics combinations, orally inhaled (long-acting)	Tiotropium bromide/Olodaterol (Stiolto Respimat) - when COPD accepted
PA	B63	Beta adrenergics & glucocorticoids combination	Fluticasone/Salmeterol (Advair Diskus/HFA) - when asthma or COPD accepted
A	D4J	Proton pump inhibitors	Omeprazole magnesium (generics only) Omeprazole (generics only) Pantoprazole (generics only)

Status	TCC	Therapeutic class description	Preferred drug(s)
A	H2E	Sedative-hypnotics, Non-barbiturate ***Acute use only***	Zaleplon (generics only) Zolpidem (generics only) Ramelteon (Rozerem)
	H8B	Melatonin MT1/MT2 receptor agonists	
A	H6H	Skeletal muscle relaxants	Baclofen (generics only) Cyclobenzaprine (generics only) Methocarbamol (generics only) Tizanidine IR (generics only) (Carisoprodol products - not covered)
A	H2S	Serotonin specific reuptake inhibitors (SSRIs)	Citalopram (except solution) Escitalopram (except solution) Fluoxetine (except tablet) Fluvoxamine (except ER capsule) Paroxetine (except CR/ER tablet) Sertraline (except concentrate) Mirtazapine (generics only) Duloxetine (generics only) Venlafaxine/ER (except ER tablet) Bupropion/SR/XL (generics only)
	H7B	Alpha-2 receptor antagonists/serotonin-	
	H7C	Norepinephrine reuptake inhibitors (SNRIs)	
	H7D	Norepinephrine and dopamine reuptake inhibitors (NDRIs)	
A	H7T	Antipsychotics, atypical dopamine and serotonin antagonist	Aripiprazole (generics only) Asenapine (Saphris SL) Brexipiprazole (Rexulti) Cariprazine (Vraylar) Clozapine (generics only) Iloperidone (Fanapt) Lurasidone (Latuda) Olanzapine (generic oral formulations only) Paliperidone ER (generics only) Quetiapine/ER (generics only) Risperidone (generics only) Ziprasidone (generics only)
	H7X	Antipsychotics, atypical D2 partial agonist/5HT mixed	
	H8W	Antipsychotic, atypical D3/D2 partial agonist-5HT mixed	
A	Q7P	Nose preparations, anti-inflammatory steroids	Budesonide (OTC only) Fluticasone propionate (OTC only) Triamcinolone acetonide (OTC only)

Status	TCC	Therapeutic class description	Preferred drug(s)
A	R1A	Urinary tract antispasmodic agents/urinary tract antispasmodic	Oxybutynin/ER (generics only) Tolterodine/ER (generics only) Trospium/ER (generics only)
	R1I	M(3) selective antagonists/overactive bladder agents	
	R1V	Beta-3 adrenergic receptors	
A	S2B	NSAIDs, cyclooxygenase inhibitor type	Diclofenac Potassium/Sodium/DR/EC/ER (generics only) Etodolac/ER (generics only) Flurbiprofen Ibuprofen (generics only) Indomethacin/ER (generics only) Ketoprofen/ER Ketorolac (generics only) Meloxicam (generics only) Nabumetone
	S2L	Cyclooxygenase 2-selective inhibitor	Naproxen/Sodium (generics only) Piroxicam (generics only) Oxaprozin (generics only) Sulindac
PA	W0A	Hepatitis C virus NS5A replication complex inhibitors	Glecaprevir/pibrentasvir (Mavyret) Sofosbuvir/velpatasvir/voxilaprevir (Vosevi) - limited to FDA-approved indications
	W0B	Hepatitis C virus NS5B polymerase & NS5A inhibitor combinations	Sofosbuvir/Velpatasvir (Eplclusa) - for decompensated cirrhosis
	W0D	Hepatitis C virus NS5A, NS3/4, NS5B inhibitor combinations	
	W0E	Hepatitis C virus NS5A and NS3/4A inhibitor combinations	**see policy for coverage criteria for Direct-acting Antivirals for Hepatitis C**
	W0G	Hepatitis C Virus -NS5A, NS3/4A Protease, Nucleotide NS5B Polymerase Inhibitor Combination	
	W5V	Hepatitis C virus NS3/4A serine protease inhibitors	

	W5Y	Hepatitis C virus nucleotide analog NS5B polymerase inhibitors ***Effective January 1, 2018***	
--	-----	--	--

Status	TCC	Therapeutic class description	Preferred drug(s)
A	W1D	Macrolides	Azithromycin (generics only) Clarithromycin/ER (generics only) Erythromycin base (generics only) Erythromycin EC (generics only) Erythromycin ethylsuccinate (generics only) Erythromycin stearate (generics only)
A	Z2Q	Antihistamine - 2nd generation	Cetirizine (generics only) Loratadine (generics only)
PA	Z2X	Phosphodiesterase-4 (PDE 4) inhibitors	Roflumilast (Daliresp) - when COPD accepted
A	Z4B	Leukotriene modifiers	Montelukast (generic tablet and granule packet only)
	Z4E	5-lipoxygenase inhibitors	Zafirlukast (generics only)
