ACOEM and the Washington State
Department of Labor and Industries jointly
sponsor this course.

Overview

This course was developed through the collaborative efforts of physicians and the Department of Labor and Industries in response to doctors' requests for assistance in handling workers' compensation claims and industrial conditions.

Participants will receive fundamental and complex clinical information that will immediately simplify daily care situations and improve patient management success. All doctors, no matter how long they have been in practice, can learn how to:

- Prevent workers' long term disability by addressing behavioral and mental health issues,
- Reduce their administrative burden and
- Calculate physical capacities for injured workers.

Course Objectives

Participants will learn to:

- Calculate an injured worker's physical capacities during different phases of recovery
- Explain how Vocational Rehabilitation Counselors, Claim Managers, and Employers use physical capacity information in their differing roles.
- Revise their daily clinical practices to assure good return to work experiences for the worker, employer, and other parties to an industrial injury claim.
- Utilize appropriate resources to identify and manage mental health, behavioral issues, and chronic pain.

NOTE: All MDs, DOs, DCs, ARNPs and PAs are encouraged to enroll.
