

Update to the Washington State Labor & Industries (L&I) Provider Network Status Report (PNSR)

This message is important for organizations that are planning to write scripts to automatically download and import the PNSR into their systems

In our previous notification, L&I announced that it would be providing an enhanced version of the PNSR that included an additional “Payment Code” column. We also noted that, for about 60 days starting in early June, both the current and enhanced versions of the PNSR would be available on the [PNSR website](#). This period will allow time for organizations to transition from the old to the new version of the report. In early August, the old version will be removed.

In our recent PNSR webpage redesign, we were able to keep the same static URL for the current PNSR. **The upcoming enhanced PNSR needs to have a slightly different file name (and hence URL),** in order that it be available concurrently with the current PNSR on the website. It will still be a static URL. We hope that a 60 day transition period will allow sufficient time for you to alter your scripts to point to the enhanced PNSR and apologize for any disruption it may cause.

Although the enhanced PNSR is not up on the PNSR website yet, we are providing the new URLs below, for your advanced planning purposes. Currently, these links will lead to a “Page not found”.

http://www.lni.wa.gov/download/SelfIns/SIE_Extract_V2.txt

http://www.lni.wa.gov/download/SelfIns/SIE_Extract_V2.xls

http://www.lni.wa.gov/download/SelfIns/SIE_Extract_V2.xml

L&I will send out additional updates, once the enhanced PNSR files are available.

Thank you for your ongoing interest in L&I’s Medical Provider Network.
