**Primary Occupational Health: Potential Issues ▲**

- COHE Enhancement – Current work is focused on:
  - Determining target COHE presence for each Accountable Community of Health
  - Developing COHE communications plan within context of Healthy Worker 2020
  - Analyzing data about injured workers who "age out" of COHE
  - Refining HSC standard work
  - Building stronger connections between COHE and return-to-work programs

- COHE Performance – Working on business specifications for enhanced performance measures
- Top Tier – Currently awaiting IT resource availability

**Surgical Care: On Target ●**

- Provided Scorecards to Surgical Best Practices Pilot Surgeons
- Adopted post-surgery transition timelines for selected shoulder, spinal fusions, and total joint replacements recommended by Dr. Huang, Pilot Medical Director at Proliance Orthopedics Associates
- Ongoing planning for future consolidated surgical best practices program

**Chronic Pain & Behavioral Health Best Practices: On Target ●**

- In the process of defining minimum standards patient identification, assessment, episode of care, care coordination, and roles and responsibilities for implementing in healthcare
- Estimated launch pilot around July 2019
- SIMP is presenting recommendations to ACHIEV at July 26, 2018, meeting

**Physical Medicine: On Target ●**

- Identified top three priorities for best practices development:
  - Care Interventions Best Practices
  - Care Team Communication and Referral
  - Documentation
- Currently developing a standard progress report form / reporting tool that promotes best practices and can be utilized in various formats

**Catastrophic Care: On Target ●**

- Project completed – January 2018
- Ongoing improvement and assessment as well as integration with HW2020
- Study underway with results due in 2020
Care Coordination: On Target
- Working on identifying quality assurance options for care coordinators
- Shadowed COHE Health Services Coordinators

Model of Care: On Target
- Working on identifying areas of alignment for all Healthy Worker 2020 components using the MacColl Model as a baseline requirement tool.
- Exploring options to develop a crosswalk between Self Insured applications and OHMS
- Developing communication messaging across all Healthy Worker 2020 components

Incentives: Potential Issues
- Currently planning new framework for appropriate incentive structure

Prescribing Best Practices: On Target
- Opioid measures have been defined and approved for Primary Care best practices
- Opioid measures are being defined for Surgical Care best practices
