

For existing Voc providers - adding the HOD VocLink service

1. Go to <https://secureaccess.wa.gov/> and logon

2. Select the *Add a New Service* tab and enter LNI_VOCLINK in the *Service Code* field. Hit *Apply*.

3. Complete the *Service Registration* form and click on *Register* to submit.

Please note the following:

- The *Mainframe Logon ID* is the LINIIS logon. (This is the 7-character user ID ending '235" that was assigned to you by the department)
- For the *Firm Manager/Designee or Service Provider (VRC)?*, the user must select one role from the dropdown. If registering as a VRC, then must provide both the *Firm Provider ID* and the *Service Provider ID*.

SAW HOD Home

CTS HOME HOME HOD FAQ CONTACT US SECURE ACCESS WASHINGTON

HOD CLIENT

REMOVE HOD CLIENT

JAVA™ DOWNLOAD

Welcome to the CTS Secure Access Washington homepage for HOD This site offers access to the Host On-Demand (HOD) client as well as compatibility information. If you are having trouble accessing HOD, check the "HOD FAQ" tab above. If the information there does not solve your issue, head over to the "Contact Us" tab and email the CTS Servicedesk to open a help ticket. Someone will contact you and aid you in troubleshooting HOD.

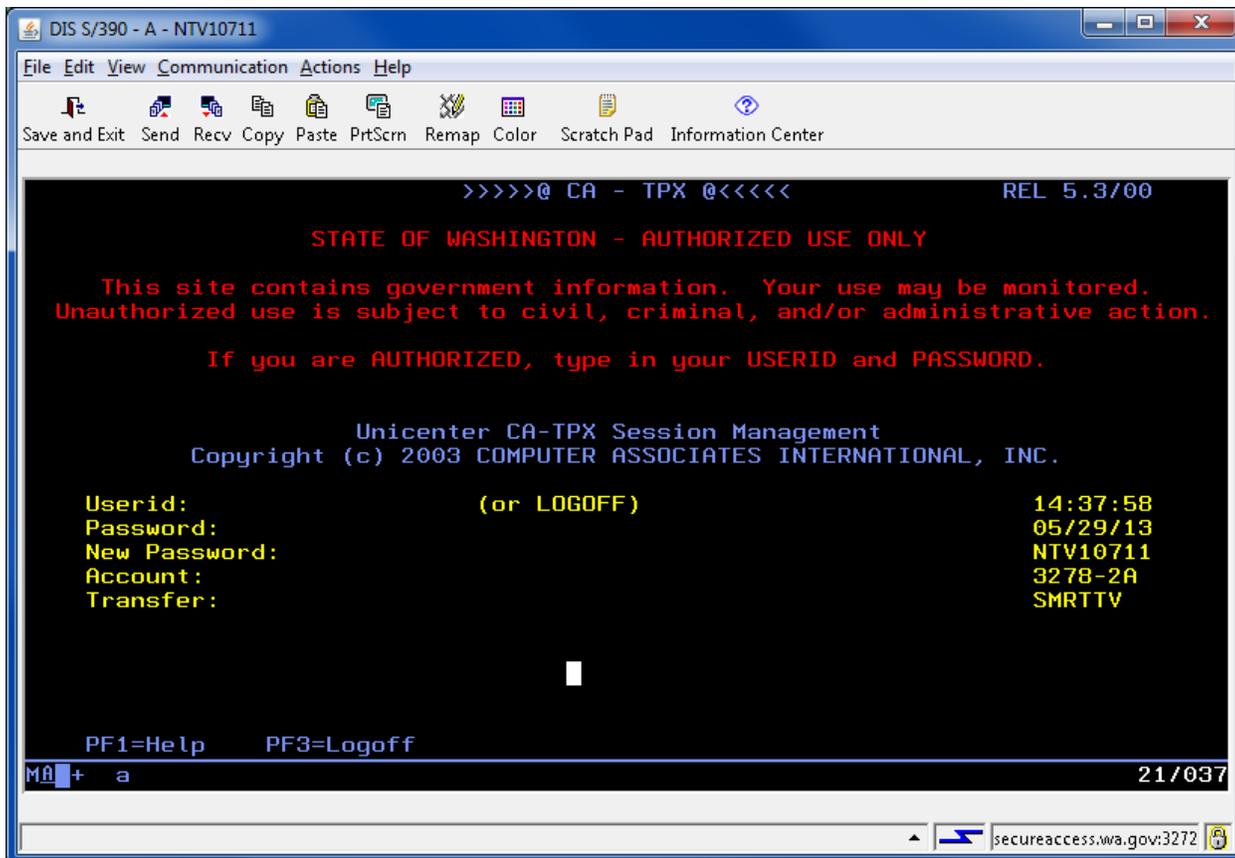

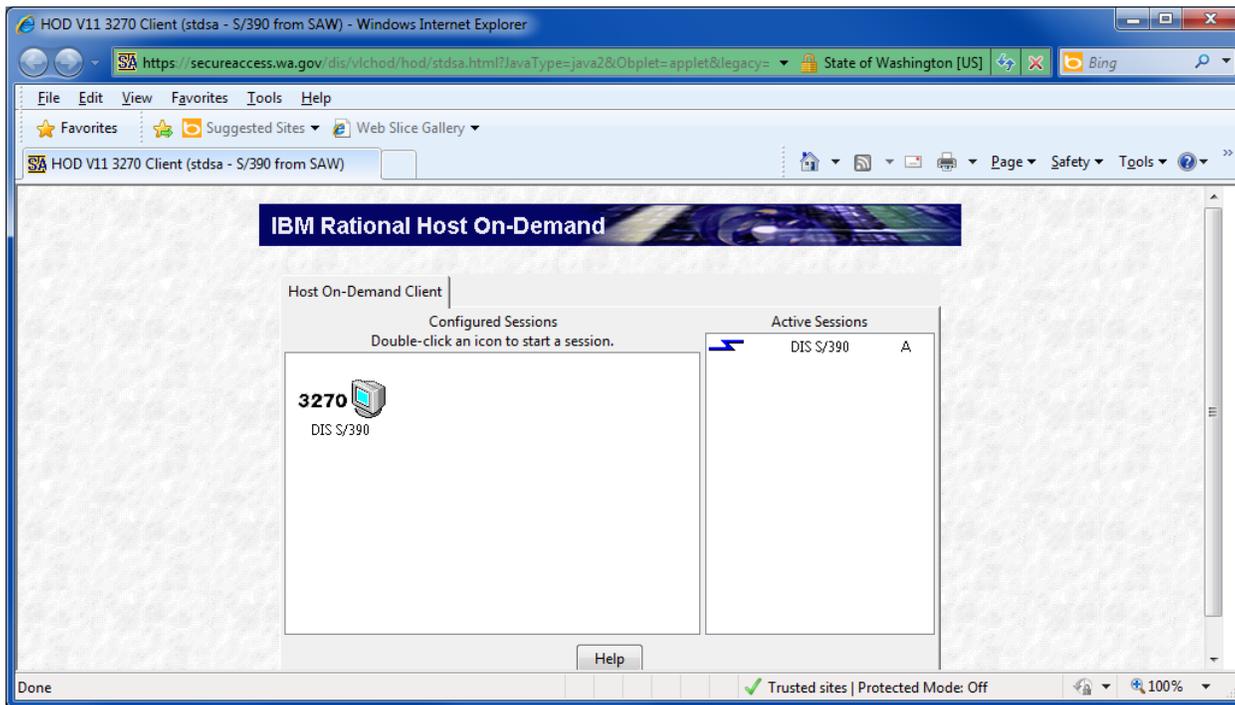

the HOD home page has a new look as well as increased functionality. Please take a minute to go through these first steps:

1. Read through a [brief tutorial](#) on the new HOD home page
2. Ensure your system is compatible by checking the [HOD FAQ](#) tab
3. Access HOD V11 by selecting the "HOD CLIENT" link on the left side of this page

https://secureaccess.wa.gov/dis/vlchod/hod/stdsa.html

Trusted sites | Protected Mode: Off

6. Click on the HOD Client button on the left side. This should open two windows:
 - IBM Rational Host On-Demand with the 3270 icon for LINIIS
 - A LINIIS TPX logon (note: if this 2nd window did not open, then double-click on the 3270 icon to open the TPX logon page)
 - Note: users may initially receive a pop-up requesting approval for a Java download. They should select OK. After the brief download, the IBM Rational Host On-Demand window should open followed a couple seconds later by the LINIIS TPX logon.

7. From this point on, the LINIIS VocLink logon process will function as it always has. Logon to TPX. The user will then be taken to the TPX Menu. Selecting PF4 opens the LINIIS logon page. Input the user ID and password and hit ENTER. The screen will now display *SIGN ON COMPLETE*. Input LVOC in the upper left hand corner and hit ENTER.
