

Hazard: Unstable Logs on Loads

Don't chance an unstable log rolling off your load!

Logs not contained in the stakes can roll off and strike drivers wrapping the load

If the logs are above the stakes and pose a hazard, have the loader operator secure the logs until all wrappers are on and tightened.

Prepared by WA State Fatality Assessment and Control Evaluation (WA FACE) program. WA FACE is supported in part by a grant from the National Institute for Occupational Safety and Health (NIOSH grant 2U00H008487).
