Tight Squeeze?

Don’t risk it. Stay out of the way when forklifts are working!

Forklift drivers
- Treat the 6-foot area around the forklift as a danger zone.
- Always look in the direction you are traveling.
- Don’t drive distracted. No earbuds or loud music.

Everyone else
- Keep to designated walking paths.
- Never walk up behind a forklift.
- Wait until the forklift stops, get the driver’s attention, then walk up.
