1. Record keeping requirements for agricultural employment. Agricultural employers must keep records of employee name, address, occupation, dates of employment, rate or rates of pay, the amount paid to each employee during each pay period, and the hours worked. See WAC 296-131-017.

Records must be made available to the department, upon request.

2. Records must also be made available to employees. An agricultural employee who requests “his or her work record” may inspect the records that his or her employer is required to keep “at any reasonable time”.

a. “Employee work record” means the original records required by WAC 296-131-015 and -017 and are to include the name, address, and occupation of each employee; dates of employment; rate or rates of pay including regular and overtime rates; amount paid each pay period to each employee; all deductions from or additions to wages; and the hours and dates worked including regular and overtime hours.

Such records shall be open upon request to inspection, review, transcription and/or photocopying by the employee and must be available at the employee's usual place of employment.
b. "Upon request" shall mean an oral or written request by the employee.

c. "At any reasonable time" shall mean within 10 business days from date of request by employee.

3. Records must be kept for three years. Agricultural employers must keep all records required for at least three years. See [WAC 296-131-017](#).

a. The term "all records required" shall include the original time records, including dates and hours worked, recorded on time sheets, time clocks, time cards, computer-generated time records, video camera (if used as a means of record keeping by the employer), or any other method of recording hours worked. Records transferred from such original records to a computer or other record keeping device do not satisfy the requirements of the Agricultural Employment Standards rules, [WAC 296-131](#).

4. Agricultural employees are entitled to itemized pay statements. At the time wages are paid, [RCW 49.30.020](#) requires that each agricultural employee receive an itemized statement showing:

   - Pay basis in hours or days worked.
   - Rate or rates of pay.
   - Gross pay.
   - All deductions from the pay for the respective pay period.

5. Payment by direct deposit. Employers may pay employees by direct deposit as long as there is no cost to the worker to withdraw their wages from the financial institution.

6. Pay statements when paying by direct deposit. When paying by direct deposit, employers must provide the pay statement on the established payday. The pay statement may be transmitted electronically, e.g., by e-mail, as long as each employee has access to receive the information and to copy it. If the employees do not have the means to receive an electronic pay statement, or to copy it, the employer shall provide a separate pay statement to employees with the pertinent information on the regular payday.

7. "An itemized statement" generally means a separate statement issued to employees on each payday. Pay periods shall be identified by month, day, year, and payment date. If employers provide all of the information required on the pay statement on the face of the check, and there is access to a copier where the paycheck is received for the employees to make a copy of their paycheck, a separate pay statement is not necessary. An employee shall not be required to go to an outside vendor to copy the paycheck that contains the information required on the pay statement.
a. Additional requirements on pay statement. WAC 296-131-015 requires that the pay statement must also:

- Identify the employee.
- Show the number of hours worked or the number of days worked based on an eight-hour day.
- Show the number of piece work units earned if paid on a piece work basis.
- Identify the pay period.
- Identify the purpose of each deduction.
- State the employer’s name, address and telephone number.

8. Employment of minors (under age 18). Additional record keeping requirements for minors working in agriculture are required under WAC 296-131-130, specifically, proof of age and parent and school authorization.

9. Employer’s failure to comply with record keeping requirements. The department may issue a Notice of Infraction to agricultural employers for failure to comply with agricultural employment record keeping requirements, per RCW 49.30.040. In the event of an investigation by the department, an employer’s failure to keep and produce the required records may result in the department’s acceptance of records kept by employees to determine back wages owed.

10. Recordkeeping requirements of the Minimum Wage Act, RCW 49.46. The initial record keeping requirements of the Minimum Wage Act (MWA) are similar to those under WAC 296-131. Employers subject to the MWA must keep a record of each employee’s name, address, occupation, rate of pay, amount paid in each pay period and hours worked each day and each workweek. See RCW 49.46.070.

Additionally, under the provisions of the MWA, employers must keep the following records:

- Employee’s date of birth, if under the age of 18.
- Time of day and day of the week that each employee’s workweek begins.
- Total daily or weekly earnings at straight time rate.
- Total overtime earnings for weeks in which overtime was worked.
- Date of the wage payment and the dates of pay period covered.
- Total wages paid for each pay period.
- All additions or deductions to or from the wages for each pay period and a record of the additions or deductions from pay.

11. Time Clocks and Rounding Practices. Employers may use time clocks, sign-in/out sheets, electronic swipe cards, time cards, or other method of keeping track of employee’s dates and hours worked. Employees must be paid for all time worked, which includes all preparatory and concluding activities. Employers may pay for all minutes on the time card, or may use the rounding practices described below.
a. **Differences between clock records and actual hours worked when rounding is not used:** Time clocks are not required. When employer’s use the time clock method, minor differences between the clock records and actual hours worked cannot ordinarily be avoided, but major discrepancies should be discouraged since they raise a doubt as to the accuracy of the records of the hours actually worked. The employer controls the workplace and to avoid potential pay issues surrounding time clock punches, should not allow employees to arrive and clock in early for their own convenience. Should employees arrive before their scheduled starting time and begin their work, or continue to work after their closing time, they must be paid for that time unless as described in the following paragraphs.

When a time clock is used, an employee must be allowed to punch in at the time they are required to report for work and must be allowed to punch out only when they are finished performing tasks at the end of their shift. If a written time card is used, an employee or their supervisor must be allowed to record the actual time they are required to report for work and the time when they are finished performing tasks at the end of their shift.

b. **Rounding practices:** It has been found that in some industries, particularly where time clocks are used, there has been the practice for many years of recording the employees’ starting time and stopping time by rounding the time to the nearest 5 minutes, or to the nearest one-tenth or quarter of an hour. Employers may not utilize recordkeeping systems in which 15-minute segments of work time are not recorded or paid. When rounding to the nearest quarter-hour, employers must round based on the 7-minute rule, i.e., when employees are 1 to 7 minutes late, they must be paid for the entire quarter-hour; if they are 8 to 14 minutes late, payment may begin at the nearest quarter-hour. If they clock out 7 minutes before the end of their shift, they must be paid to the end of that shift; if they clock out 8 minutes prior to the end of their shift, their payment may stop at the nearest quarter-hour.

A system where it is always rounded down is not appropriate. The rounding practice must work both ways so that sometimes it is rounded up and sometimes it is rounded down. Presumably, this arrangement averages out so that the employees are fully compensated for all the time they actually work. For enforcement purposes, this practice of computing working time will be accepted, provided that it is used in such a manner that it will not result, over a period of time, in failure to compensate the employees properly for all the time they actually worked.

Rounding practices may be used only with a time clock record keeping system or when a written record keeping system accurately reflects the actual time the employee signed in before and after the scheduled shift.

c. **Examples of time clock rounding:**

The following chart is provided as an example of rounding practices based on the 7-minute rule.
d. Rounding is not permitted for meal and rest periods.

The meal and rest period requirements found in WAC 296-131-020 require a 30-minute meal period no later than the end of the 5th working hour, and a 10-minute rest period in each four-hour period of employment. Employees working eleven or more hours in a day must be allowed at least one additional 30-minute meal period. Employers cannot round, deduct, or average any time from a meal or rest period. When computing minimum wage for workers paid on a piece-rate basis, the employees rest periods must be included in the number of hours worked.
