

AMENDATORY SECTION (Amending WSR 07-12-045, filed 5/31/07, effective 7/1/07)

**WAC 296-17-31013 Building construction. (1) Does this same classification approach apply to building and construction contractors?**

Yes, but it may not appear that way without further explanation. We classify contractors by phase and type of construction since it is common for each contract to vary in scope.

**Example:** *A contractor who builds and remodels private residences may frame the structure and work on no other phases of the project. On another job the same contractor may do only the interior finish carpentry. On still another job the contractor may install a wood deck or build a garden arbor. Each of these carpentry activities is covered by a different classification code. To ensure that contractor businesses receive the same treatment as other businesses, we assign classifications according to the phases and types of construction they contract to perform. Since some contractors specialize in one area of construction, such as plumbing, roofing, insulation, or electrical services, this classification approach mirrors that of nonbuilding contractor businesses. The policy of assigning several basic classifications to contractors engaged in multiple phases of construction may seem to be in conflict with the classification approach used for nonbuilding contractor businesses, but we have simply used the **multiple business** classification approach.*

If we have assigned multiple classifications to your construction business you should take special care in maintaining the records required in the auditing and recordkeeping section of this manual. If we discover that you have failed to keep the required records we will assign all worker hours for which the records were not maintained to the highest rated classification applicable to the work that was performed.

**(2) Who does this rule apply to?**

If you are a building, construction or erection contractor and we have assigned one or more of the following classifications to your business, this rule applies to you: 0101, 0103, 0104, 0105, 0107, 0108, 0112, 0201, 0202, 0210, 0212, 0214, 0217, 0219, 0301, 0302, 0303, 0306, 0307, 0403, 0502, 0504, 0507, 0508, 0509, 0510, 0511, 0512, 0513, 0514, 0516, 0517, 0518, 0519, 0521, 0540, 0541, 0550, 0551, 0601, 0602, 0603, 0607, 0608, and 0701.

**(3) Can I have a single classification assigned to my business to cover a specific construction project?**

Yes, to simplify recordkeeping and reporting requirements we will assign a single classification to cover an entire project.

**(4) How do I request the single classification for one of my**

**construction projects?**

You should send your request to the attention of your account manager at the address below:

Department of Labor and Industries  
P.O. Box 44144  
Olympia, Washington 98504-4144

**(5) If I have asked for a single classification on one of my construction projects, how do you determine which classification will apply?**

You must supply us with a description of the project and a break down of the total number of hours of exposure by phase of construction that you are responsible for.

*Example:* You notify us that your company will be responsible for all plumbing and iron erection work on a commercial building site. You have requested a single classification for this project. In your request you tell us that you estimate that it will take one thousand work hours to perform all the plumbing work and five hundred work hours to do the steel erection work.

With this information we will estimate the premiums by classification.

*Example:* We determine that the plumbing work is covered under classification 0306 and the steel erection work is covered under classification 0518. Assume that classification 0306 has an hourly premium rate of \$1.50 and classification 0518 has an hourly premium rate of \$2.55. We estimate the total premium on this job to be \$2,775 (1,000 hours x \$1.50 = \$1,500 + 500 hours x \$2.55 = \$1,275).

Our next step in this process is to develop an average hourly rate for the project. We will use this information to select the single classification which will apply to this project.

*Example:* We will take the estimated premium (\$2,775) and divide this number by the estimated hours (1,500) and arrive at an average hourly rate of \$1.85.

To select the single classification that will apply to a construction project, we will compare the average hourly rate that we have computed to the rates of the classifications applicable to the project. We will select the classification whose hourly rate is the closest to the average hourly rate that we computed from the information you supplied us with.

*Example:* From the information you supplied, we have determined that the average hourly rate for this project is \$1.85. We also know that the rate for the plumbing classification (0306) is \$1.50 per hour and the rate for steel erection is \$2.55 per hour. We would assign classification 0306 as the single classification applicable to this project.

**(6) How will I know what classification will apply to my construction project?**

We will send you a written notice which will specify the basic classification and premium rate that will apply to this project.

**(7) If I have asked for a single classification to cover one of my construction projects, am I required to use the single**

**classification which you gave me?**

No, but you should call your account manager to verify what other classifications would apply to the project. The name and phone number of your account manager can be found on your quarterly premium report or your annual rate notice. For your convenience you can call us at 360-902-4817 and we will put you in contact with your assigned account manager.

**(8) I am a general construction or erection contractor, I subcontract all my work and have no employees of my own. Do I have to report to the department of labor and industries?**

No, since you do not have employees, you do not need to report to the department of labor and industries. You should be aware that the workers' compensation insurance laws of Washington include certain independent contractors as workers. If we determine that an independent contractor that you used qualifies as a covered worker, you will be responsible for the premium due for their work time. You can also be held responsible for premiums due to labor and industries if you subcontract with an unregistered contractor and they fail to pay premiums on behalf of their employees. It is in your best interest to make sure that your subcontractors are registered contractors in good standing by confirming their status on the department's web site or contacting your account manager.

**(9) Am I required to keep any special records of subcontractors that I use?**

Yes, you are required to keep certain information about the subcontractors that you use. The information required is:

- Subcontractor's legal name;
- Contractor registration number and expiration date;
- UBI number (or labor and industries account ID number).

If you supply materials to a subcontractor, also keep a record of the:

- Amount of material supplied;
- Project name or location;
- Date material was supplied; and
- Completion date of contracted work.

Failure to maintain these records may result in the subcontractor being considered a covered worker for whom you must report hours.

**(10) What classification should I use to report construction site cleanup by my employees?** You should report the cleanup of construction debris in the same classification that applied to the work which generated the debris unless another classification treatment is provided for in other rules. For example, if you are a roofing contractor and you have an employee pick up roofing debris at the construction (project) site, you would report the employee involved in the site cleanup in the roofing classification (0507). If you are the general contractor at a construction site and have either classification 0510 "wood frame building construction" or classification 0518 "nonwood frame building construction" assigned to your business, you would report site cleanup in the classification applicable to the type of building you are constructing. For example, if you are a general contractor

and you are engaged in building a single-family wood frame dwelling, you would report construction site cleanup by your employees in classification 0510 "wood frame building construction."

(11) **I am a construction site clean-up contractor, my employees only pick up construction debris, we do no construction work, what classification do I report site cleanup in?** If your employees are collecting and/or removing construction site debris, you would report in classification 4305-22. If your employees are collecting and/or removing nonconstruction debris such as household junk, garden waste, basement debris, furniture and appliances, you would also report in classification 4305-22. If you have contracts to clean up construction debris and also provide preoccupancy clean up work and are not a construction contractor, then you can divide hours between the two risk classifications 4305-22 and 6602-03 providing accurate accounting records are kept for both activities.

(12) **What classification should I use to report the work time of my employees when they are involved in the set up of scaffolding, hoists, cranes, towers or elevators at a construction site?** We use the same classification treatment for this type of work as we do with construction site cleanup. For example, if you are a roofing contractor and you have an employee set up scaffolding at the construction (project) site, you would report the employee involved in the set up of scaffolding in the roofing classification (0507). If you are the general contractor at a construction site and have either classification 0510 "wood frame building construction" or classification 0518 "nonwood frame building construction" assigned to your business, you would report the set up of scaffolding at the construction in the classification applicable to the type of building you are constructing. For example, if you are a general contractor and you are engaged in building a single-family wood frame dwelling, you would report scaffolding set up by your employees in classification 0510 "wood frame building construction." Helicopter services that are engaged to assist in lifting beams, air conditioning units, statues and other objects onto buildings or structures are to be reported separately in classification 6803.

(13) **Is preoccupancy cleanup of a building by my employees classified the same as debris cleanup at a construction site?** Since your understanding of what preoccupancy clean-up work is may be different from ours, we need to share with you our understanding before we can answer this question. Our understanding in this area is that preoccupancy cleanup occurs after the building is finished. The clean-up work consists of washing paint and overspray from windows, vacuuming carpets, washing floors and fixtures, and dusting woodwork, doors and cabinets. If you have employees whose duties are limited to this type of cleaning, we will allow you to report their work time in classification 6602 "janitors."

(14) **If I have an employee who does some construction work, construction site cleanup and preoccupancy cleanup, can I divide their work time between the janitor and a construction classification?** No, we will not permit you to divide the work time

of an employee between the janitor classification and a construction classification. If you have an employee who does preoccupancy clean-up work for you, and that employee also performs other nonpreoccupancy clean-up work for you such as construction work, shop work or construction site debris clean-up work, then you must report all of their work time in the applicable construction or nonshop classification.

AMENDATORY SECTION (Amending WSR 07-01-014, filed 12/8/06, effective 12/8/06)

**WAC 296-17A-0202 Classification 0202.**

**0202-02 Pile driving - wood or concrete piling construction**

Applies to contractors engaged in pile driving and piling construction. Pile driving involves long sturdy posts or columns of timber, steel, or concrete being driven into the earth as a foundation or support for a structure such as a building, pier or wharf. This type of activity usually occurs when a portion of the structure is going to be under water, in mud, at a site where the ground is soft or unstable, or when the structure is expected to be of extraordinary weight. Work contemplated by this classification includes driving wood or steel beams, driving concrete columns, shaft sinking or caisson work, stacking of concrete piles, erection of a cofferdam, and includes all cross beaming, decking, and similar carpentry incidental to, and connected with, pile driving operations as part of the foundation construction project. Shaft sinking is removal of earth from a hole with a relatively small diameter and usually at a considerable depth. The cofferdam is a temporary structure from which water can be pumped or sucked to provide a dry work area during construction of the foundation or substructure. Once the foundation support is complete, the cofferdam is taken apart and removed.

This classification excludes diving operations or activities which are to be reported separately in classification 0202-04.

**Special note:** Pile driving projects could occur on or adjacent to navigable waters (harbors, rivers, canals) which is defined as those which form a continuous highway for interstate or international commerce. Workers who perform the work activities from on board a vessel could be subject to the Admiralty Law which recognizes such work crews and workers as a master or member of a vessel, and subject to federal law known as the Jones Act. Every person on board a vessel is deemed a seaman if connected with the operation while on navigable water. The term vessel has been interpreted by the courts to include any type of man-made floating object such as a floating derrick, pile driver or dredge, a barge, or a pontoon (which is a flat bottom boat) or portable float. Workers who perform the work activities from the shoreline or from adjacent areas such as an existing dock, pier, or bridge may or may not be subject to federal law covered under the U.S. Longshore and Harbor Workers Act. Usually, pile driving projects involve a variety of types of work crews such as those working from a floating derrick or pile driver, a barge, a pontoon, a shoreline pile crew, workers inside the cofferdam, as well as the maintenance and repair of the construction material or equipment. Care should be exercised prior to assignment of this classification as the

workers could be subject to either or both of these acts. The criteria used in determining federal law and coverage is based on the most current federal court decisions and case law.

**0202-03 Wharf, pier, dock and marine railway: Construction, maintenance and repair**

Applies to contractors engaged in the construction, maintenance or repair of piers, wharves, docks and marine railways. A pier or wharf is a platform extending from a shore over water and supported by piles or pillars. A dock is the area between two piers or alongside a pier or wharf. These types of platforms are for vessels to tie up and provide an area for loading, unloading, or repairing vessels. Most often, the construction of such platforms will include the foundation or substructure being under water or mud, and the remainder of the platform being exposed above the water or mud. Work contemplated by this classification includes, but is not limited to, construction of the foundation or substructure which consists of shaft sinking, pile driving, stacking of piles and/or erection of a cofferdam, and includes all concrete, steel or carpentry work after the foundation or substructure is built to completion of the project. Shaft sinking involves the removal of earth from a hole with a relatively small diameter and usually at a considerable depth. Pile driving involves long sturdy posts or columns of timber, steel, or concrete being driven into the earth as a foundation or support for the structure. The cofferdam is a temporary structure from which water can be pumped or sucked to provide a dry work area during construction of the foundation or substructure. Once the foundation support is complete, the cofferdam is taken apart and removed. This classification also includes caisson work as part of the construction for the foundation or substructure support.

This classification excludes diving operations or activities which are to be reported separately in classification 0202-04.

**Special note:** The construction of piers, wharves, docks and marine railways could occur on or adjacent to navigable waters (harbors, rivers, canals) which is defined as those which form a continuous highway for interstate or international commerce. Workers who perform the work activities from on board a vessel could be subject to the Admiralty Law which recognizes such work crews and workers as a master or member of a vessel, and subject to federal law known as the Jones Act. Every person on board a vessel is deemed a seaman if connected with the operation while on navigable water. The term vessel has been interpreted by the courts to include any type of man-made floating object such as a floating derrick, floating barge, a pontoon (which is a flat bottom boat) or portable float. Workers who perform the work activities from the shoreline or from adjacent areas such as an existing dock, pier, or bridge may or may not be subject to federal law covered under the U.S. Longshore and Harbor Workers Act. Usually, these types of projects involve a variety of work crews such as those working from a floating derrick or barge, a pontoon, a shoreline pile crew, workers inside the cofferdam, as well as the maintenance and repair of the construction material or equipment. Care should

be exercised prior to assignment of this classification as the workers could be subject to either or both of these acts. The criteria used in determining federal law and coverage is based on the most current federal court decisions and case law.

**0202-04 Diving operations and subaqueous work, N.O.C.**

Applies to establishments engaged in diving operations not covered by another classification (N.O.C.). Diving operations such as underwater diving, skin diving or scuba diving are performed in numerous types of uncontrolled environments such as the ocean, harbors, bays, dams, lakes, as well as controlled environments such as swimming pools or aquarium tanks. Work contemplated by this classification includes, but is not limited to, marine salvage and wreckage, underwater mining and sweeping, underwater construction or demolition, installation, repair and/or inspection of wharves, piers, and docks, inspection of ships, barges, and other vessels, (~~subaqueous harvesting of geoduck, sea cucumbers, or similar marine life,~~) underwater exploration, as well as diving instruction. Classification 0202 includes all diving activities with the following exception: Diving instructors who provide instructional lessons in a controlled environment such as a swimming pool may be reported separately in classification 6209 provided accurate time records are maintained for the instructional lesson hours. Failure to maintain accurate time records will result in the hours in question being assigned to classification 0202 without a division of hours between the two classifications.

**Special note:** Many diving operations and activities occur on or adjacent to navigable waters (a harbor, river, canal, dam, lake) which is defined as those which form a continuous highway for interstate or international commerce. Workers who perform diving activities (to include divers, deck hands, or "diving tenders" who are support personnel such as line handlers and pump persons) from on board a vessel could be subject to the Admiralty Law which recognizes such work crews and workers as a master or member of a vessel, and subject to federal law known as the Jones Act. Every person on board a vessel is deemed a seaman if connected with the operation while on navigable water. The term vessel has been interpreted by the courts to include any type of man-made floating object such as a floating derrick or dredge, a boat or ship, a barge, or type of pontoon (which is a flat bottom boat) or portable float. Workers who perform diving activities (to include divers, deck hands, or "diving tenders" who are support personnel such as line handlers and pump persons) from the shoreline or from adjacent areas such as an existing dock, pier or bridge may or may not be subject to federal law covered under the U.S. Longshore and Harbor Workers Act. Care should be exercised prior to assignment of this classification as the workers could be subject to either or both of these acts. The criteria used in determining federal law and coverage is based on the most current federal court decisions and case law.

**0202-05 Geoduck harvesting by divers (to be assigned only by the maritime specialist)**

Applies to establishments engaged in diving operations to harvest wild geoduck clams from natural areas. Work contemplated by this classification includes subaqueous harvesting of geoduck clams, sea cucumbers or similar marine life. This classification includes workers tending to such divers. The employees of the divers and tenders shall be subject to this classification whether or not such work is performed from a vessel.

***Special note:*** Many diving operations and activities occur on or adjacent to navigable waters (a harbor, river, canal, dam, lake) which is defined as those which form a continuous highway for interstate or international commerce. Workers who perform diving activities (to include divers, deck hands, or "diving tenders" who are support personnel such as line handlers and pump persons) from on board a vessel could be subject to the Jones Act or Admiralty Law which recognize such work crews and workers as masters or members of a vessel, and subject to federal law known as the Jones Act. Every person on board a vessel is deemed a seaman if connected with the operation while on navigable water. The term vessel has been interpreted by the courts to include any type of man-made floating object such as a floating derrick or dredge, a boat or ship, a barge, or type of pontoon (which is a flat bottom boat) or portable float. Workers who perform diving activities (to include divers, deck hands, or "diving tenders" or other support personnel such as line handlers and pump persons) from the shoreline or from adjacent areas such as an existing dock, pier or bridge may or may not be subject to federal law covered under the U.S. Longshore and Harbor Workers Compensation Act (LHWCA). Care should be exercised prior to assignment of this classification as the workers could be subject to either or both state fund or federal jurisdiction. The criteria used in determining federal law and coverage is based on the most current federal court decisions and case law.

AMENDATORY SECTION (Amending WSR 07-01-014, filed 12/8/06, effective 12/8/06)

**WAC 296-17A-2004 Classification 2004.**

**2004-21 Iron or steel merchants; wire rope and cable dealers**

Applies to establishments engaged as iron or steel merchants or as dealers of wire rope, cable, or metal conduit. This classification includes the merchandising of nonferrous metals such as, but not limited to, copper, brass, or aluminum. This classification is distinguished from scrap metal dealers in classification 0604 who deal primarily in used metal as opposed to merchants in classification 2004 who sell new goods. Iron or steel merchants receive metal in the form of beams, sheets, plates, bars, rods, pipe, rounds, channels, angles, tubes, or coils from the mills which they unload with overhead cranes, and store them in

their shop or yard. Using power equipment such as shearers, hacksaws, drills, benders, and cutting torches, they are cut, sheared, and formed to customer specifications. Wire rope and cable dealers use coilers to wind the wire rope or cable from large spools onto smaller spools, and use saws or other cutting tools to cut it to length and large hydraulic presses to attach sockets, pulleys and other hardware to wire rope to form rigging used by the fishing, logging, and construction industry.

This classification excludes scrap metal and junk dealers which are to be reported separately in classification 0604, and rebar fabricators which are to be reported separately in classification ((~~3402~~) 5209).

AMENDATORY SECTION (Amending WSR 07-01-014, filed 12/8/06, effective 12/8/06)

**WAC 296-17A-2102 Classification 2102.**

**2102-00 Warehouses - general merchandise**

Applies to establishments operating as warehouses for general merchandise. This merchandise belongs to a customer and is usually stored for long periods of time. Products typically involved are bulk, nonperishable materials which might include, but not be limited to, rice, coffee, potatoes, or dry cement. Work contemplated by this classification includes, but is not limited to, unloading deliveries, moving merchandise within the facility, recordkeeping, security, and maintaining the facility. Equipment and machinery used includes pallet jacks, forklifts, routine maintenance, cleaning and recordkeeping supplies, and shop vehicles.

This classification excludes delivery drivers who are to be reported separately in classification 1102; wholesale dealers who operate a warehouse for storage of their own product which is to be reported separately in the classification applicable to the product being sold; warehousing of household furnishings by a moving and storage company which is to be reported separately in classification 6907; cold storage plants which are to be reported separately in classification 4401; ministorage warehousing which is to be reported separately in classification 4910; field bonded warehouses which are to be reported separately in classification 2008; and the warehousing of a manufacturer's own product which is to be reported separately in the manufacturing classification applicable to the work being performed.

**Special note:** Even though this type of operation may handle some "grocery" products, it differs from 2102-11 in that the products being handled in 2102-00 are in bulk packaging (not cases of consumer-size packages), do not belong to the business that is warehousing them, and are not intended for sale to a wholesaler/retailer.

**2102-04 Recycle, collection and receiving stations; rags, bottles, paper and metal container dealers, N.O.C.**

Applies to establishments engaged in the collection of used paper, aluminum, tin, glass, and plastic for the purpose of selling the material to another business that will recycle/remanufacture it into new products. These facilities normally acquire material by placing collection bins at various remote locations, operating a drop-off center (this phase of the business is known in the trade as a "buy back center")(~~(, and employing drivers to pick up from businesses)~~). Work contemplated by this classification includes, but is not limited to, sorting material, operating various pieces of equipment used to crush, reduce, wash, and bale material, weighing containers, paying customers for receipt of items that have a redemption value by the pound or piece ("buying back"), and operating shop or yard vehicles. Machinery and equipment includes, but is not limited to, shredders, balers, can crushers, weigh scales, forklifts, collection bins, shop or yard vehicles, and rolloff trucks to handle the collection bins. This classification includes dealers of rags, bottles, paper and metal containers not covered by another classification (N.O.C.)

This classification excludes (~~(drivers who are)~~) all trucking outside of the yard which is to be reported separately in classification 1102 and establishments engaged in collecting, sorting and reducing scrap metal such as junk dealers, scrap metal dealers or processors, which also receives glass, paper, plastic, etc., which are to be reported separately in classification 0604.

**Special note:** Classification 2102-04 should not be assigned to an employer who also operates a business subject to classification 4305-18 (Garbage, refuse or ashes collecting) without careful review and an on-site survey. Most garbage collecting businesses have some type of "recycle" program as part of their normal operations in an effort to sort and reduce the amount of waste that goes to landfills and this is considered an inclusion.

**2102-11 Grocery, fruit or produce distributors - wholesale or combined wholesale and retail**

Applies to establishments engaged in the wholesale, or wholesale/retail, distribution of a variety of grocery items, fruit and produce. A business in this classification buys products from the manufacturer and sells to retail grocery stores, restaurants, and similar businesses. Grocery items may include, but not be limited to, packaged foods, frozen foods, household cleaning supplies, paper products, personal care items, beer, soda, and dairy products. Work contemplated by this classification includes, but is not limited to, unloading deliveries, moving merchandise within the facility, incidental repackaging, breakdown of merchandise into smaller lots, recordkeeping, security, and maintaining the facility. Equipment and machinery includes, but is not limited to, pallet jacks, forklifts, strapping and shrink wrapping equipment, and vehicles.

This classification excludes delivery drivers who are to be

reported separately in classification 1101; any general merchandise warehouse operations in which the operator of the warehouse does not own the merchandise being handled and it is in bulk quantities, which is to be reported separately in classification 2102-00; cold storage plants handling food products which are to be reported separately in classification 4401; operations specializing in vegetable/fruit packing for wholesale distribution which are to be reported separately in classification 2104; operations specializing in wholesale distribution of beer, wine, ale or soft drinks which is to be reported separately in classification 2105; field bonded warehouses which are to be reported separately in classification 2008; and the warehousing of a manufacturer's own product which is to be reported separately in the manufacturing classification applicable to the work being performed.

#### **2102-28 Wool or cotton merchants**

Applies to establishments operating as wool or cotton merchants. Merchants subject to this classification buy raw wool or cotton from others, do incidental sorting, grading and repackaging, and sell the product to another business for use as a raw material to make products such as yarn, thread or fabric. Work contemplated by this classification includes, but is not limited to, unloading deliveries, moving merchandise within the facility, hand sorting the product by grade (quality), repackaging, recordkeeping, security, and maintaining the facility. Equipment and machinery includes, but is not limited to, pallet jacks, forklifts, repackaging equipment and vehicles.

This classification excludes drivers who are to be reported separately in classification 1102; wholesale dealers of a finished wool or cotton product which are to be reported separately in the classification applicable to the product; and the warehousing of a manufacturer's own product which is to be reported separately in the manufacturing classification applicable to the work being performed.

AMENDATORY SECTION (Amending WSR 07-01-014, filed 12/8/06, effective 12/8/06)

#### **WAC 296-17A-3304 Classification 3304.**

##### **3304-00 Fish processors, packers and repackagers - wholesale or combined wholesale/retail**

Applies to establishments engaged in processing, packaging, and repackaging fish such as salmon, cod, whitefish, halibut, tuna, and/or shellfish when conducted by a wholesale or combined wholesale/retail operation. Typically, fish will arrive at a port via a commercial fishing vessel. Before the load of fish is accepted the wholesaler will inspect the commercial fishing vessel's records to ensure that the fish were caught, handled and

stored in accordance with all applicable laws. The fish is then unloaded, identified, inspected for quality, weighed and stored in a refrigerated area or a freezer to await further disposition. Fish are processed, packed and repackaged as requested by the customers. Processing may include, but is not limited to, cutting, filleting, cooking, and/or canning. The fish may be sold to fish and meat markets, supermarkets, grocery stores, restaurants, or other wholesale dealers. (~~This classification includes fishing activities that are not covered by another classification (N.O.C.) and the harvesting, planting or packaging of aquatic plants or shellfish obtained from natural areas where the husbandry of the resource is not an integral part of the operation.~~)

This classification excludes establishments engaged in the cold storage or locker operations of products owned by others which are to be reported separately in classifications 4401 or 4404 as applicable; establishments engaged in the raising, harvesting and subsequent processing and packing of shellfish which are to be reported separately in the appropriate classifications; and establishments engaged exclusively in retail fish activities, or the packaging of whole minnow, herring, or anchovy (not processed), which are to be reported separately in classification 3303.

**3304-01 Meat and/or poultry dealers - wholesale or combined wholesale/retail**

Applies to establishments engaged in the wholesale or combined wholesale/retail distribution of fresh, frozen, cured, or smoked meat or poultry. Wholesale dealers generally purchase meat (whole, half, or quarter carcasses) from slaughterhouses, and poultry from poultry processing plants. The meat or poultry is cut into steaks, chops, roasts, fillets or poultry parts, for sale to commercial or institutional customers such as restaurants, hotels, grocery stores, meat and poultry markets, hospitals, and prisons. Wholesale dealers typically do not have display cases for the meat or poultry and receive orders by telephone or by mail. This classification includes the processing and butchering of poultry.

This classification excludes meat products manufacturing, canning or dehydrating, and packing house or slaughterhouse operations, which are to be reported separately in classification 4301; custom meat cutting operations, including farm kill, which are to be reported separately in classification 4302; cold storage or locker operations which are to be reported separately in classifications 4401 or 4404 as applicable, when conducted as a separate and distinct business; establishments engaged in processing, packaging, and repackaging fish which are to be reported separately in classification 3304-00; and retail meat, fish and poultry dealers who are to be reported separately in classification 3303.

**WAC 296-17A-3402 Classification 3402.**

**3402-00 Air compressor: Manufacturing or assembly**

Applies to establishments engaged in the manufacture or assembly of air compressors. This includes air or gas compressors used for paint sprayers, air tools, tire inflation, and general industrial purposes. Operations contemplated include, but are not limited to, welding, machining, general mechanical and electrical work. Machinery and equipment includes, but is not limited to, hand and air tools, welders, punches, shears, and compression equipment. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

**3402-01 Printing or bookbinding machinery: Manufacturing or assembly**

Applies to establishments engaged in the manufacture or assembly of printing or bookbinding machinery. The outside casings of the machines may be made of plate metal that varies between 1" to 2 1/2" in thickness. The machines used to make the presses and binding machinery may include both Computer Numeric Controlled (CNC) and manual mills and lathes. Other machinery used in the manufacturing process includes, but is not limited to, welders or cutters, grinders, and drill presses. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; and the set up, installation and repair of printing or bookbinding machinery which is to be reported separately in classification 0603.

**3402-02 Pump, safe, scale, auto jack, and water meter: Manufacturing or assembly**

Applies to establishments engaged in the manufacture or assembly of pumps, safes, scales, auto jacks, and water meters. Materials range from brass screws and rubber washers used to rebuild water meters to plate metal and steel castings used for safe and pump manufacturing. Machinery includes, but is not limited to, hand tools used for repairs, lathes, welders, and pressure testers. This classification includes the repair of items

being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; the installation and repair of safes which is to be reported separately in classification 0607; and the installation of pumps which is to be reported separately in the applicable classification.

**3402-03 Shoe or textile machinery: Manufacturing or assembly**

Applies to establishments engaged in the manufacture or assembly of shoe machinery or textile machinery. Metal materials used vary in size, shape and dimension. Machinery includes, but is not limited to, drills, mills, lathes, saws, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and the installation and repair of shoe or textile machinery which is to be reported separately in classification 0603.

**3402-04 Confectioners or food processing machinery: Manufacturing or assembly**

Applies to establishments engaged in the manufacture or assembly of food processing or confectioners machinery. Metal materials used vary in size, shape and weight. These establishments often have an assembly line operation and a separate electronic assembly area. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and the installation and repair of confectioners and food processing machinery which is to be reported separately in classification 0603.

**3402-05 Machine shops, N.O.C.**

Applies to establishments engaged in general machine shop operations not covered by another classification (N.O.C.), tool sharpening, and mobile welding shops. Many of the establishments in this classification are "job shops." Size and shape of

materials vary with steel and aluminum being the most common. Plastics, light weight aluminum, and alloyed metals are becoming increasingly popular in the manufacture of equipment for some industries. These establishments often have welding shops along with machine shops. Machinery and equipment includes, but is not limited to, mills, lathes, grinders, saws, welding equipment, inspection equipment, and material handling equipment. Machinery is both manual and Computer Numeric Controlled (CNC). This classification also includes "mobile shops" which are used *exclusively* to repair machinery or equipment. A "mobile shop" in this classification usually means a van or pick up pulling a utility trailer equipped with hand tools, specialty tools, air tools, a compressor, and a portable welding unit. The machinery or equipment is usually repaired at the customer's location, however, sometimes the broken part is removed and taken back to the shop for repair.

This classification excludes repairs to buildings and structures which are to be reported separately in the appropriate construction classification, and mechanical repairs which are to be reported separately in the classification applicable to the work being performed.

**Special note:** The term "job shop" is an industry term that means the shop will produce products to customer specifications.

**3402-06 Power saw, lawn and garden equipment, small motor, N.O.C.:  
Repair**

Applies to establishments engaged in repairing small power tools, small motors powered by gas or diesel, outboard marine engines, and lawn and garden equipment not covered by another classification (N.O.C.). The largest piece of equipment repaired in this classification is generally a riding lawn mower. Classification 3402-06 is assigned in conjunction with a store classification for establishments that have a store operation and also repair the type of items they sell. Classification 3402-06 may also be assigned to a manufacturers representative who performs warranty repairs. Tools used in this type of repair are mainly hand and air tools. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and the repair of electrical motors which is to be reported separately in classification 5201.

**3402-07 Gear: Manufacturing or grinding**

Applies to establishments engaged in the manufacture or grinding of gears. Establishments in this classification may also cut key slots and broaches. Establishments that cut stock to manufacture the gear are often not the same ones that perform the final grinding process. Gears may go through two, three, or four different grinding, slotting, and/or keying establishments and then go to another establishment for electroplating or galvanizing before they are ready for sale or use. Precision machine shops may grind gears to the ten thousandths of an inch. Materials used are

usually stainless steel, aluminum, or plastic. Machinery includes, but is not limited to, gear shapers, drill presses, mill, hobbers, grinders, some of which might be Computer Numeric Controlled (CNC). This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

### **3402-08 Elevator: Manufacturing**

Applies to establishments engaged in the manufacture of elevators and associated electronic components. Machinery includes, but is not limited to, mills, drills, lathes, saws, and grinders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and the installation, service, and repair of elevators which is to be reported separately in classification 0602.

### ~~((3402-11 Metal goods: Manufacturing and shop services (temporary classification))~~

~~Applies temporarily to all establishments assigned any classification within WAC 296-17-580. When the metal goods study is complete, the establishments within this classification will be assigned to the appropriate classifications. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation.~~

~~This classification excludes all activities away from the shop or plant.)~~

### **3402-12 Multimedia blasting**

Applies to establishments engaged in multimedia (such as, but not limited to, glass, plastic and sand) blasting operations which strip paint or other coatings from metal or fiberglass. Most of the blasting operations in this classification are done on automobiles, but it also applies to establishments that perform blasting on items such as, but not limited to, barbecue grills, and cast iron pieces. Multimedia blasting processes in this classification are performed in a shop, use less air pressure and media with softer finishes than other blasting operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and sandblasting of buildings or structures which is to be reported separately in classification 0504.

**3402-14 Furnace, heater, radiator, wood, propane, or pellet stoves: Manufacturing**

Applies to establishments engaged in the manufacture of furnaces, radiators, wood, propane, or pellet burning stoves or similar heating fixtures. Materials include, but are not limited to, metal cast parts, sheet metal, plate metal, aluminum, or stainless steel. Machinery includes, but is not limited to, hand tools, solder guns, punches, lathes, and saws. Establishments in this classification may have separate areas for electronic assembly and/or painting. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in the manufacture of radiators for automobiles or trucks which are to be reported separately in classification 3402-48; and establishments engaged in the manufacture of baseboard heaters which are to be reported separately in classification 3404.

**3402-16 Die casting**

Applies to establishments engaged in the manufacture of products by die casting. Die casting is a manufacturing process for producing accurately-dimensioned, sharply-defined metal products which are referred to as "die castings." "Dies" are the steel molds used to mass produce the product. The process begins when ingots of various metal alloys are melted in die casting machines. The machine forces the metal into the die under hydraulic or pneumatic pressure. The casting quickly solidifies in the die, and is automatically ejected by the machine, and the cycle starts again. The castings are cleaned by grinding or sanding, which also removes any excess metal "flash." Many die casting manufacturers maintain their own machine shop for making the dies. Die making, when done as a part of die casting operations, is included within the scope of this classification. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; and establishments engaged in making dies for others which are to be reported separately in classification 3402-74.

### **3402-26 Saw blade: Manufacturing, assembly, or sharpening**

Applies to establishments engaged in the manufacture, assembly, or sharpening of saw blades such as, but not limited to, those used in circular saws, band saws, rip saws, keyhole saws, and handsaws such as hacksaws or meat saws. This classification also includes sharpening services for items such as, but not limited to, tools, scissors, and knives. Materials include, but are not limited to, high tensile steel and carbide tipped blades. Machinery includes, but is not limited to, saws, mills, drills, and hand tools. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in the repair or sharpening of chain saws which are to be reported separately in classification 3402-06; and establishments engaged in the manufacture or repair of electrical saws which are to be reported separately in classification 5201.

### **3402-28 Heat treating metal**

Applies to establishments engaged in heat treating metal. The heat treating process may use computer numeric controlled ovens or furnaces. The oven may heat up to 1200 degrees Fahrenheit and a furnace may heat up to 2000 degrees Fahrenheit. The metal(s) is placed on a platform; the platform is hydraulically moved into the first chamber and the door is automatically closed. At this time, the oxygen is burned from the chamber. Then the second chamber door is opened and the metal enters the oven/furnace. Depending upon the specifications, the heat treating process usually takes six to sixteen hours. When the metal is finished in the heating chamber it returns automatically to the first chamber. Then the platform lowers and the metals are dipped into a cooling agent. Once the metals are cooled to room temperature the platform rises, the door opens, and the materials are removed. The process is essentially the same using noncomputer numeric controlled heat treating equipment except that, rather than being hydraulically operated, the machine operators move the metals through the system. Many establishments do not produce a product, but heat treat a variety of products to customer specifications. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

### **3402-29 Nut, bolt, screw, nail, tack, rivet, eyelet spike, needle, N.O.C.: Manufacturing**

#### **Sprinkler head, speedometer, carburetor: Manufacturing or assembly**

Applies to establishments engaged in the manufacture of nuts,

bolts, screws, nails, tacks, rivets, eyelets, spikes, and needles not covered by another classification (N.O.C.). This classification also applies to establishments engaged in the manufacture or assembly of sprinkler heads, speedometers, or carburetors. Materials include, but are not limited to, steel or iron rods which may be pressed or formed, and small component parts. Machinery includes, but is not limited to, saws, shears, presses, chuckers, threading and tapping machines, some of which may be Computer Numeric Controlled (CNC). Establishments may have separate areas for deburring, inspecting, packing and shipping. The carburetor rebuilding may be performed on vehicles that are driven or towed into the shop, or on carburetors that have been already removed from the vehicles. In either case the repairs are made exclusively with hand and air tools and sometimes a diagnostic scope and a drill press. A speedometer is usually embodied with a mileage recording mechanism. The central feature of the device is a permanent magnet. There are gears, spindles, and a drive shaft present in most speedometers. There is also a unit counting disc and a spiral spring calibrator. Hand tools are used almost exclusively in the repair of this kind of speedometer. Today many speedometers are computer controlled. Basically, if this kind of speedometer is in need of repair, a computer chip(s) is replaced, using hand tools. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of hardware that is not covered under another classification, such as handles, latches, and hinges which are to be reported separately in classification 3404, and the repair of speedometers or carburetors in a vehicle which is to be reported separately in the appropriate vehicle repair classification.

### **3402-32 Abrasive wheel: Manufacturing**

Applies to establishments engaged in the manufacture of abrasive wheels. Manufacturing operations often include a laboratory where carbon and other materials are mixed together to form the abrasive edge of the mainly high tensile steel wheels. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

**3402-40 Welding or cutting, N.O.C. (mobile operations limited to repair of equipment and machinery)**

Applies to establishments engaged in welding or cutting operations not covered by another classification (N.O.C.) either in the shop or at the customer's site. Steel is the predominant material along with some aluminum alloys. Machinery is predominantly welding equipment, but may include tools such as, but not limited to, grinders, saws, drills, and material handling equipment. This classification also includes "mobile shops" which are used *exclusively* to repair machinery or equipment. A "mobile shop" in this classification usually means a van or pick up pulling a utility trailer equipped with hand tools, specialty tools, air tools, a compressor, and a portable welding unit. The machinery or equipment is usually repaired at the customer's location, sometimes with the use of the customer's equipment; however, broken parts may be removed and taken back to the shop for repair.

This classification excludes welding construction and repairs to buildings or structures which are to be reported separately in the appropriate construction classification and mechanical repairs which are to be reported separately in the classification applicable to the work being performed.

**3402-48 Automobile or truck, radiator and heater core: Manufacturing and repair shops**

Applies to establishments engaged in the manufacture and/or repair of automobile or truck radiator and heater cores. Manufacturers in this classification may have a die casting area and a separate electronic assembly area. Tools and equipment include, but are not limited to, hand tools, solder guns, and punches. Shops that repair radiators may work on the radiators in the vehicles, but usually the radiators have been removed from the vehicle. The radiator is examined and the core may be removed. Next the radiator is cleaned, air pressurized, and dipped in a water tank to check it for leaks. Once the leaks are found they can generally be repaired by welding the holes shut. The radiator is dipped again to ensure the repair has been made properly. Cleaning the radiator may be done by sandblasting, ultra sound baths or by "rodding" the radiator to remove corrosion. Repair equipment includes, but is not limited to, welders, air and hand tools, dipping tanks, hoists, and forklifts. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

**3402-60 Office machinery, N.O.C.: Manufacturing or assembly; Cash register or sewing machines: Manufacturing or assembly**

Applies to establishments engaged in the manufacture or

assembly of cash registers, sewing machines and office machinery not covered by another classification (N.O.C.) such as, but not limited to, copiers, collators, mail/postage machines, calculators and automatic letter openers. Component parts may be metal, plastic, or wood. Operations include, but are not limited to, cutting, shaping, forming, drilling, riveting, clamping, and bolting; there may be a separate electronic assembly area. Machinery and tools vary within this classification; some establishments use hand and air tools only, others use additional equipment such as, but not limited to, saws, lathes, mills, drills, or water jets, some of which may be Computer Numeric Controlled (CNC). This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

**3402-61 Small arms: Manufacturing, assembly, or rebuild**

Applies to establishments engaged in the manufacture, assembly, or rebuild of small arms. For the purpose of this classification, small arms means .50 caliber or less, such as pistols, rifles, shotguns, and light machine guns. Operations include, but are not limited to, metal stamping of casings, machining, assembling, and a high proportion of inspecting. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in the manufacture of ammunition which is to be reported separately in classification 4601; the manufacture or repair of heavy arms which is to be reported separately in classification 5109; and gun stores which are to be reported separately in classification 6309.

**3402-74 Tool: Manufacturing, not hot forming or stamping; Die: Manufacturing - ferrous**

Applies to establishments engaged in tool manufacturing or die manufacturing, for others, from ferrous materials. Tools manufactured in this classification are usually cutting tools used in lathes, mills, rotors, and saws. Machinery includes, but is not limited to, sharpeners, grinders, lathes and mills, which are both manual or Computer Numeric Controlled (CNC). The die manufacturing included in this classification includes those made exclusively of ferrous materials including, but not limited to, jigs, fixtures, and dies for metal work in general. This classification includes

the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of machine-finished tools which are to be reported separately in classification 3402-83.

**3402-77 Auto, truck, semi-trailer and bus body: Manufacturing; Travel trailer body: Manufacturing or repair**

Applies to establishments engaged in the manufacture of auto, truck, and bus bodies, and in the manufacture or repair of travel trailer bodies or cargo containers. Repairs are usually made with the use of welders or cutting torches and air or hand tools. These establishments will also repair or replace hydraulic units. Material used in the manufacture of goods in this classification is usually steel and aluminum, varying in thickness from 16 gauge to plate metal up to one inch thick. Shapes include, but are not limited to, sheet metal, tubes, solid rod or I-beams. Equipment includes, but is not limited to, shears, breaks, hydraulic presses, iron workers, drill presses, grinders, welders, hoist, cranes, and forklifts. Shops may have a finish sanding area as well as a paint area where the vehicle bodies are sprayed with primer, a body bonding material, or a finish coat of paint. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

**3402-83 Tool: Manufacturing and machine finishing**

Applies to establishments engaged in manufacturing and machine finishing tools. Tools manufactured in this classification are usually hand held instruments such as, but not limited to, wrenches, screw drivers, hammers, torque wrenches, pliers, and sockets. Machinery includes, but is not limited to, air and hand tools, polishers, grinders, inspection equipment, mills, lathes, shapers, and drill presses, some of which may be Computer Numeric Control (CNC). Establishments may have a galvanizing and/or electroplating area for the finish work which is included when performed by employees of employers subject to this classification. Other establishments in this classification send the finish work out. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is

done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in the manufacture of tools from ferrous materials which are to be reported separately in classification 3402-74; and establishments engaged in tool forging which are to be reported separately in classification 5106.

**3402-85 Auto or truck parts: Machining or rebuild not in vehicle**

Applies to establishments engaged in machining or rebuilding auto or truck parts such as, but not limited to, water pumps, fuel pumps, transmissions, heads, brake drums, ball joints, and rear ends, which are not in the vehicle. Work contemplated in this classification may also include manufacturing sockets, pulleys, shafts, fittings, flywheels, and/or bearings. Machinery includes, but is not limited to, mills, lathes, grinders, sanders, presses, welders, and balancing equipment. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in manufacturing or rebuilding auto, truck, or aircraft engines which are to be reported separately in classification 3402-86.

**3402-86 Auto, truck or aircraft engine, N.O.C.: Manufacturing or rebuilding**

Applies to establishments engaged in manufacturing or rebuilding auto, truck, or aircraft engines not covered by another classification (N.O.C.), including manufacturing the component parts. Establishments in this classification often specialize in the type of engines they make or rebuild. The basic difference between automobile, truck, and aircraft engines is the size and weight of the parts being worked on. Engine rebuild shops use many specialized machines and air tools to tear the core down to an engine block; then rebuild the engine. After the engine is stripped down to the engine block, it is placed in a machine called a baker which heats to approximately 600 degrees and bakes away the grease. After baking, the engine block is placed in a sand blaster where the surface is cleaned with very fine steel shot. The engine block is then placed in a large pressure washer which removes the steel shot. Next, the crank and cam shafts are ground and turned on machinery similar to lathes. There is usually a separate room or area which is called the "head shop" where the heads and valves are machined on valve grinders, valve facers, and head grinders. Engine rebuild shops that do not have the equipment to grind the crank and cam shafts will contract work out to other shops, or buy new crank shafts and cam shafts. Other machinery includes, but is not limited to, boring bars and hones to polish cylinder walls, small pressure washers for oil pans and other smaller parts, solvent tanks, and hoists or forklifts for lifting the engines or

engine parts. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in machining or rebuilding auto or truck parts, other than engines, which are to be reported separately in classification 3402-85.

**3402-91 Bed spring or wire mattress: Manufacturing**

Applies to establishments engaged in the manufacture of bed springs or wire mattresses. The wire stock is coiled and cut to length on a coiling machine, then tempered in an oven to produce the spring. The coils are fastened to the frame either by hand or by machine. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of stuffed mattresses which are to be reported separately in classification 3708.

**3402-93 Valve: Manufacturing**

Applies to establishments engaged in the manufacture of valves. Valves regulate the flow of air, gases, liquids, or loose material through structures by opening, closing, or obstructing passageways. They are operated manually, electrically, with compressed air, or hydraulic pressure. Valves are usually cut from aluminum, steel, or stainless steel either by a Computer Numeric Controlled machine (CNC) or water jet machine. Depending upon the complexity of the valve, they are assembled in one or several stages. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of valves made in a die mold which are to be reported separately in classification 3402-74.

**3402-94 Precision machined parts, N.O.C.: Manufacturing**

Applies to establishments engaged in manufacturing precision machined parts not covered by another classification (N.O.C.).

Most of these establishments are "job shops." Job shops make component parts for other businesses according to customer specifications, rather than manufacturing a specific product. Many establishments in this classification manufacture precision parts for the aerospace industry. Machining usually begins with solid blocks of material such as, but not limited to, steel, aluminum, titanium, inconel, or plastic, although some hollow tube, flat bar, and angle stock may also be used. The "rough cuts" are often made on manual machines, and the finish cuts on Computer Numeric Controlled (CNC) machines. Depending on the establishment and the job specifications, a specific part may be sent to one or more additional shops to be tempered, milled, or inspected before the original establishment is through with the manufacturing process. Some parts are so sensitive that climate controlled conditions are necessary. Both manual and CNC mills and lathes are the most common types of machines used. Others include, but are not limited to, saws, drills, and grinding machines. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

**3402-95 Storage battery: Manufacturing, assembly or repair**

Applies to establishments engaged in the manufacture, assembly, or repair of storage batteries. Lead ingots, weighing 20-25 pounds, are melted and poured into a mold or casting machine. After the grids are cooled lead oxide is then pumped onto each side of a grid and cured by baking in an oven of about 300 - 400 degrees F. The plates are then assembled by placing a negative separator (zinc) between a positive separator (copper), and so forth until there are enough of these cells to form the battery. Next, they are sent to a burning machine that cures the paste and plates. After the burning process, the plates are placed into a plastic or hard rubber box-like container and cured for two or three days. The plates are welded together and the top is attached to the body of the battery case with an epoxy glue. Diluted sulfuric acid is added to the battery and then it is put on a charger. The battery is then cleaned and packed for shipping. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in the manufacture of dry cell (flashlight type) batteries which are to be reported separately in

classification 3602; and establishments engaged in battery sales and installation which are to be reported separately in the applicable automotive services classification.

**3402-96 Automobile or motorcycle: Manufacturing or assembly**

Applies to establishments engaged in the manufacture or assembly of automobiles or motorcycles. Most of the manufacturing operations, such as cutting, milling, and turning, are performed with Computer Numerically Controlled (CNC) machinery. Most of the assembly operations are performed with air and hand tools. Other machinery includes but is not limited to saws, grinders, and drill presses. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged only in the manufacture of auto bodies which are to be reported separately in classification 3402-77.

**3402-98 Machinery, N.O.C.: Manufacturing or assembly**

Applies to establishments engaged in the manufacture or assembly of machinery not covered by another classification (N.O.C.). For purposes of this classification, machinery means any combination of mechanical parts constructed primarily with metal. Finished products vary widely and range from hand held machines to those weighing thousands of pounds; products include, but are not limited to, grinding machines, boring machines, conveyer systems, and wood chippers. Machinery used to manufacture these items includes, but is not limited to, lathes, mills, press, breaks, shears, and welders, some of which may be Computer Numerically Controlled (CNC). This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

**3402-99 Photo processing machinery: Manufacturing or assembly**

Applies to establishments engaged in the manufacture or assembly of photo processing machinery such as, but not limited to, photo processors or film enlargers. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being

performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

AMENDATORY SECTION (Amending WSR 07-01-014, filed 12/8/06, effective 12/8/06)

**WAC 296-17A-3404 Classification 3404.**

**3404-01 Can: Manufacturing - aluminum or galvanized**

Applies to establishments engaged in the manufacture of cans from aluminum or galvanized metals lighter than 9 gauge. Products include, but are not limited to, soda cans, food cans, and garbage cans. The galvanizing process includes dipping the tin/metal into liquid zinc. The manufacturing process involves cutting, forming, stamping, and soldering/welding. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

**3404-02 Galvanized iron works: Manufacturing - nonstructural**

Applies to establishments engaged in the manufacture of nonstructural galvanized iron from sheet metal lighter than 9 gauge. Processes include cutting, forming, welding, riveting, punching, and drilling. The equipment used includes, but is not limited to, drills, presses, punches, shears, and press breaks. Establishments in this classification may paint, powder coat, or silk screen their products; which is included when performed by employees of employers subject to this classification. This classification includes the repair of items being manufactured or assembled when done by employees of employers subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

**3404-03 Hardware, N.O.C.: Manufacturing**

Applies to establishments engaged in the manufacture of hardware that is not covered by another classification (N.O.C.), such as, but not limited to, handles, latches, hinges, and buckles.

Operations include, but are not limited to, stamping and assembly, electroplating and/or other types of finishing. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of nuts, bolts, screws, nails, tacks, rivets, eyelets, spikes, and needles which are to be reported separately in classification 3402.

#### **3404-04 Metal stamping**

Applies to establishments engaged in the mass production of products by metal stamping techniques which impress, cut out, or shape something to a desired size. Products produced by this technique include, but are not limited to, license plates, pie plates, pots, and waste baskets. This classification includes any finish work when performed by employees of employers subject to this classification. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

#### **3404-06 Metal sign: Manufacturing**

Applies to establishments engaged in the manufacture of signs from metals lighter than 9 gauge. Materials may be cut, punched, drilled, riveted, and welded. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, water jets and welders. All operations necessary to make a sign operative, such as, but not limited to, adding electrical wiring or circuitry, painting, powder coating, or silk screening are included within the scope of this classification. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; the installation or removal of signs outside of buildings which is to be reported separately in classification 0403; the installation or removal of signs inside of buildings which is to be reported separately in classification 0513; sign painting or

lettering on the inside of buildings, or establishments that paint on or apply lettering to sign "backings" that are manufactured by others, which is to be reported separately in classification 4109; and establishments engaged in the manufacture of wood or plastic signs which are to be reported separately in the classification applicable to the manufacturing process and materials.

**3404-07 Metal goods, N.O.C.: Manufacturing or assembly from materials lighter than 9 gauge**

Applies to establishments engaged in the manufacture or assembly of metal goods from materials lighter than 9 gauge which are not covered by another classification (N.O.C.) including water heaters, electric baseboard heaters, electric furnaces, boat manufacturing, and bicycles. Materials may be cut, punched, drilled, riveted, and welded. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

**3404-12 Aluminum ware: Manufacturing from sheet aluminum**

Applies to establishments engaged in the manufacture of aluminum ware such as, but not limited to, mail boxes, buckets, gutters, and down spouts, from sheet aluminum. Materials may be cut, bent, punched, drilled, riveted, and welded. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

**3404-18 Metal coffin/casket: Manufacturing or assembly**

Applies to establishments engaged in the manufacture of coffins or caskets out of metal. Materials may be cut, bent, punched, drilled, riveted, and welded. Machinery includes, but is not limited to, punches, presses, drills, shears, break presses, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated

by an employer having operations subject to this classification. Physically separated upholstery departments of establishments engaged in furniture, coffin, casket manufacturing, assembly, or finishing may be reported separately in classification 3808 provided all the conditions in the general reporting rule covering the division of an employees hours have been met.

This classification excludes all activities away from the shop or plant, and establishments engaged in the manufacture of caskets from wood or plastic which are to be reported separately in the classification applicable to the manufacturing process and materials.

**3404-19 Metal awnings: Manufacturing or assembly**

Applies to establishments engaged in the manufacture or assembly of awnings from metals lighter than 9 gauge. Materials may be cut, punched, drilled, riveted, and bent. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant, and establishments engaged in the manufacture of awnings from canvas or other textiles which is to be reported separately in classification 3802.

**3404-20 Metal furniture, shower door, showcases: Manufacturing or assembly**

Applies to establishments engaged in the manufacture or assembly of furniture, shower doors, or showcases made with metals lighter than 9 gauge. Other items manufactured in this classification include, but are not limited to, file cabinets, desks, and stands. Material may be cut, punched, drilled, riveted, and bent. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification. Physically separated upholstery departments of establishments engaged in furniture, coffin, casket manufacturing, assembly, or finishing may be reported separately in classification 3808, provided all the conditions of the general reporting rule covering the division of an employee's hours have been met.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of wood

furniture which are to be reported separately in classification 2905.

**3404-21 Stove: Manufacturing from metals lighter than 9 gauge**

Applies to establishments engaged in the manufacture of stoves from metals *lighter than 9 gauge*. Types of stoves include, but are not limited to, electric or gas cook stoves. Accessory materials such as, but not limited to, electrical assembly units, glass, plastic, or wood may be used in the manufacture of stoves. Materials may be cut, punched, drilled, riveted, and bent. Establishments in this classification may paint or powder coat their products which is included when performed by employees of employers subject to this classification. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, grinders and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant, and establishments engaged in the manufacture of wood stoves or other stoves made of metals 9 gauge or heavier which are to be reported separately in classification 3402.

**3404-24 Metal electric or gas lighting fixtures, lampshades or lantern: Manufacturing or assembly**

Applies to establishments engaged in the manufacture or assembly of metal fixtures, lampshades, or lanterns from materials lighter than 9 gauge. The metal fixtures may be equipped with electrical or gas lighting and used as signs or other display mediums. Metal may be cut, punched, drilled, riveted, and bent. Depending on the item being made, electrical or gas-filled tubes or bulbs may be attached. Machinery includes, but is not limited to, punches, presses, drills, shears, break presses, grinders, welders, and solders. Establishments in this classification may make a finished product or only component pieces. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes establishments engaged in the manufacture of neon tube signs or displays that are not attached to metal backings which are to be reported separately in classification 3602, and all activities away from the shop or plant.

**3404-25 Brass or copper goods: Manufacturing**

Applies to establishments engaged in the manufacture of brass

or copper goods such as, but not limited to, belt buckles, lamp stands, cooking utensils, and flower pots. Materials may be cut, punched, drilled, riveted, and bent. Machinery includes, but is not limited to, punches, presses, drills, shears, break presses, water jets, grinders, welders/solders and brazing guns. Establishments in this classification may make a finished product or a component part. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

**3404-26 Aluminum window, sash or door: Manufacturing or assembly**

Applies to establishments engaged in the manufacture or assembly of windows, sashes or doors from aluminum. Accessory materials such as, but not limited to, glass, wood or plastic may also be used in the assembly process. Materials may be cut, punched, drilled, riveted, and bent. Machinery includes, but is not limited to, punches, presses, drills, shears, break presses, grinders, and welders/solders. Establishments in this classification may make a finished product or only component parts. Manufacturers may paint, enamel, or bake a finish onto products, which is included when performed by employees of employers subject to this classification. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in manufacturing vinyl window sashes which are to be reported separately in classification 3512; and establishments engaged in manufacturing wooden window sashes and doors which are to be reported separately in classification 2903.

**3404-27 Auto or truck parts, N.O.C.: Manufacturing or assembly; miscellaneous stamped parts**

Applies to establishments engaged in the manufacture or assembly of auto or truck parts not covered by another classification (N.O.C.), and of miscellaneous stamped parts, such as, but not limited to, hub caps, fenders, and trim. Galvanizing or electroplating is included in this classification when performed by employees of employers subject to this classification. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations

subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

**3404-29 Metal ski and toboggan: Manufacturing**

Applies to establishments engaged in the manufacture of skies or toboggans primarily from metal although wood or plastic component parts may also be used. Materials may be cut, punched, drilled, riveted, and bent. Machinery includes, but is not limited to, punches, presses, drills, water jets, shears, break presses, grinders, and welders/solders. Establishments in this classification may make a finished product or only a component part. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

AMENDATORY SECTION (Amending WSR 07-01-014, filed 12/8/06, effective 12/8/06)

**WAC 296-17A-4906 Classification 4906.**

**4906-01 Institutions of higher education - public**

Applies to *public* institutions of higher education such as universities, colleges, and junior colleges that have obtained state accreditation and are supported at least in part by public funds. Work contemplated by this classification includes, but is not limited to, administrative staff, professors/teachers, advisors, librarians, athletic coaches, medical staff at a hospital or research center run as part of the institution, restaurant/snack shop staff, campus security, janitorial/maintenance staff, clerical office and sales personnel.

This classification excludes private institutions of higher education which are to be reported separately in classification 4906-02 and secondary technical or vocational schools which are to be reported separately in classifications 6103 and 6104.

**4906-02 Institutions of higher education - private**

Applies to *private* institutions of higher education such as universities and colleges that have obtained state accreditation.

These private institutions include any institution of higher education that is not supported by public funds. Work contemplated by this classification includes, but is not limited to, administrative staff, professors/teachers, advisors, librarians, athletic coaches, medical staff at a hospital or research center run as part of the institution, restaurant/snack shop staff, campus security, janitorial/maintenance staff, and clerical office and sales personnel.

This classification excludes public institutions of higher education which are to be reported separately in classification 4906-01 and secondary technical or vocational schools which are to be reported separately in classifications 6103 and 6104.

AMENDATORY SECTION (Amending WSR 07-01-014, filed 12/8/06, effective 12/8/06)

**WAC 296-17A-6602 Classification 6602.**

**6602-02 Contract window washing services**

Applies to establishments engaged in contract window washing services not done in connection with a janitorial service. These establishments specialize in cleaning both interior and exterior windows in residential and commercial, single and multistory buildings. Also included in this classification is the service of defogging multiple-paned windows.

This classification excludes establishments engaged in residential cleaning which are to be reported separately in classification 6602-04 and establishments engaged in both commercial and residential cleaning which are to be reported separately in classification 6602-03.

**6602-03 Janitorial cleaning services, N.O.C.**

Applies to establishments engaged in providing general interior cleaning services for commercial businesses or for combined commercial and residential customers. General cleaning services include, but are not limited to, washing, waxing, and polishing floors, vacuuming and shampooing carpets, dusting and washing walls, dusting or cleaning mirrors, cabinets, moldings, lights, hardware, sinks, tubs, commodes, and appliances, and replacing light globes, paper or linen towels. This classification includes window washing when performed by the janitorial service employees in conjunction with a general house cleaning contract, it also includes the cleaning of swimming pools, spas and hot tubs. Fire restoration, which includes cleaning smoke or water damaged buildings, drying and/or cleaning carpets and upholstered furniture, washing and polishing furniture, washing walls, washing and waxing floors, cleaning personal contents of the home or business such as linens, dishes, drapes, and other general cleaning tasks, are included in this classification.

This classification excludes establishments engaged exclusively in contract window washing services which are to be reported separately in classification 6602-02, and establishments engaged in residential cleaning which are to be reported separately in classification 6602-04.

**Special note:** Care should be exercised with companies specializing in fire restoration or water damage related work. These companies may be general contractors who will not only do the clean up work, but will also do repairs such as, but not limited to, repair or replace cabinets, doors, and fixtures, patch drywall, paint, and replace windows. Construction-related tasks, when performed by a company doing the clean up work, are to be assigned the appropriate construction classification. Each contract should be reviewed to determine the proper classification assignment. A division of individual work hours between classification 6602 and any construction, erection, or shop classification is not allowed. Employees having duties that fall within a construction classification and who are also engaged in preoccupancy cleanup are to be reported in the applicable construction classification.

#### **6602-04 Janitorial cleaning services - residential**

Applies to establishments engaged in providing general interior janitorial cleaning or services to residential customers. General cleaning services include, but are not limited to, washing, waxing, and polishing floors, vacuuming and shampooing carpets, dusting and washing walls, dusting or cleaning mirrors, cabinets, moldings, lights, hardware, sinks, tubs, commodes, and appliances. This classification includes window cleaning when performed in connection with a general house cleaning contract.

This classification excludes establishments engaged exclusively in contract window cleaning which are to be reported separately in classification 6602-02 and establishments engaged in commercial or combined commercial and residential cleaning which are to be reported separately in 6602-03.

#### **6602-05 Janitors, N.O.C.**

Applies to the janitorial staff assigned to clean the clerical and administrative offices of establishments whose principle business undertaking is other than providing janitorial services and who are eligible to report their clerical employees in classification 4904. *This classification is applicable only to janitors who clean the office area.* Janitors who clean outside the office area such as a shop, warehouse, or retail store area, are excluded from this classification and are to be reported separately in the classification applicable to the employer's business.

**Special note:** See the special exception section of the general rules for a complete description of these requirements.

#### **6602-08 Pest control**

Applies to establishments engaged in pest control services for others. These establishments offer inspection for, and elimination of, unwanted pests in buildings and other wooden structures. Pests include, but are not limited to, termites, carpenter ants, fleas, ticks, mice, ants, cockroaches, and bees. This classification

applies to all operations of elimination services such as, but not limited to, spraying liquid or aerosol pesticide, dusting with powder, setting out traps or bait, applying pesticides to the soil to creating a chemical barrier around the base of a structure, digging trenches around foundations, and drilling holes through masonry surfaces in order to pour or pump chemicals into the infected areas. Establishments may also offer inspection and certification services for customers seeking mortgage approval. This classification also includes the removal of pet waste from the yards of private residences.

This classification excludes any structural repairs which are to be reported separately in the appropriate construction classification.

**6602-10 Portable cleaning and washing, N.O.C.**

Applies to establishments engaged in cleaning and washing services not otherwise classified (N.O.C.). This classification contemplates cleaning and washing, by means of portable spray or steam power units, machinery, equipment, automobiles, trucks, recreational vehicles, mobile homes, walk-in freezers, and shopping carts. This classification also applies to the cleaning or removal of snow from roofs, gutters or downspouts of one-story buildings.

This classification excludes establishments engaged in cleaning buildings or structures, cleaning or removing snow from roofs, gutters, and downspouts on multistory buildings, which are to be reported separately in classification 0504.

**6602-12 Street and building decoration: Hanging or removing flags or bunting**

Applies to establishments engaged in hanging or removing flags or bunting for conventions, celebrations, events, or similar decorations on the exterior or interior of buildings, structures, or streets. Buntings are strips of decorative cloth which may be used to span a roadway to promote events, as overhead streamers at an auto sales lot, or as a sign hung on a building to advertise grand openings.

This classification excludes the manufacture of flags or bunting which is to be reported separately in the applicable classification.

AMENDATORY SECTION (Amending WSR 07-01-014, filed 12/8/06, effective 12/8/06)

**WAC 296-17A-6603 Classification 6603.**

**6603-00 Auction sales: Industrial or commercial equipment or machinery**

Applies to establishments engaged in auction sales of industrial or commercial plant equipment or machinery such as, but not limited to, tractors, farm implements, backhoes, cranes, booms,

asphalt pavers, trailers, conveyors, stone crushers, lifts, bulldozers, forklifts, dump trucks, and logging equipment. Auctions are held at the auctioneer's permanent location or at the client's place of business. Work contemplated by this classification includes, but is not limited to, picking up merchandise from clients, advertising, preparing catalog listings of items for auction, preparing the auction site, demonstrating equipment at preauction inspections, estimating values, ensuring that there is title for the goods, numbering and tagging items into lots, conducting the auction, and receiving payment from buyers and paying the consignor. This classification includes clerical office and outside sales personnel, snack bars, concession stands, and lunch counters when operated by employees of the auction company.

This classification also applies to auctions performed on-line via the internet.

This classification excludes establishments engaged as equipment or machinery dealers which are to be reported separately as applicable.

**6603-01 Auction or estate sales: Antiques or general household furnishings**

Applies to establishments engaged in auction or estate sales of collectibles and antiques or of general household furnishings such as, but not limited to, furniture, pictures, vases, dishes, musical instruments, books, clothing, or lawn and garden furniture, ornaments, tools and equipment. Auctions are held at the auctioneer's permanent location or at the client's location. Work contemplated by this classification includes, but is not limited to, picking up merchandise from clients, advertising, preparing catalog listings of items for auction, preparing the auction site, opening boxes with razor blades and knives, moving merchandise with the use of hand carts, estimating values, ensuring that there is title for the goods, numbering and tagging items into lots, conducting the auction, and receiving payment from buyers and paying the consignor. This classification includes clerical office and outside sales personnel, snack bars, concession stands, and lunch counters when operated by employees of the auction company.

This classification also applies to auctions performed on-line via the internet.

This classification excludes establishments engaged as antique variety stores which are to be reported separately in classification 6304.

**6603-02 Auction sales: Specialty merchandise, N.O.C.**

Applies to establishments engaged in auction sales of specialty merchandise such as, but not limited to, fine art, furs, collectibles, cars and trucks. Auctions are held at the auctioneer's permanent location or at the client's place of business. Depending on the value of items, these types of auctions may operate on a wholesale only basis, or for dealers or qualified buyers only. Work contemplated by this classification includes, but is not limited to, picking up merchandise from clients, advertising, preparing catalog listings of items for auction,

preparing the auction site, opening boxes with razor blades and knives, moving merchandise with the use of hand carts, estimating values, ensuring that there is title for the goods, numbering and tagging items into "lots," conducting the auction, and receiving payment from buyers and paying the consignor. This classification includes clerical office and outside sales personnel, snack bars, concession stands, and lunch counters when operated by employees of the auction company. This classification excludes livestock auctions, which are to be reported in classification 4304.

This classification also applies to auctions performed on-line via the internet.

This classification excludes establishments engaged as stores or dealers which are to be reported separately as applicable.

AMENDATORY SECTION (Amending WSR 07-01-014, filed 12/8/06, effective 12/8/06)

**WAC 296-17A-7202 Classification 7202.**

**7202-00 Real estate agencies**

Applies to establishments engaged in buying, selling, renting, and appraising real estate for others. A real estate licensee will study property listings, accompany clients to property sites to show the property, and assist in the completion of real estate documents such as real estate contracts, leases, and seller's disclosure documents. They will also hold open houses, conduct negotiations, and assist at the closing. This classification includes clerical office and sales personnel. Real estate sales personnel, including agents, are considered to be workers of the broker or real estate agency employing them.

This classification excludes building and/or property management services which are to be reported separately in classification 4910.

**Special note:** Real estate sales agents are included in the industrial insurance definition of "worker" and should NOT be treated as independent contractors. (RCW 51.08.180 and 51.08.195.)

**REPEALER**

The following section of the Washington Administrative Code is repealed:

WAC 296-17A-4801                      Classification 4801.

AMENDATORY SECTION (Amending WSR 07-01-014, filed 12/8/06, effective 12/8/06)

**WAC 296-17A-0607 Classification 0607.**

**0607-11 Household appliances: Installation, service and/or repair by nonstore service or repair company; dealers of used household appliances**

Applies to establishments engaged in the installation, service and/or repair of electrical or gas household appliances and to dealers of used electrical or gas household appliances. Many establishments covered by this classification have small retail store operations where they offer reconditioned or second hand appliances for sale, a parts department, and an area where appliances brought into the shop are repaired. Although this classification deals primarily with service away from the shop, the store, parts department and shop operations are included within the scope of this classification. The term "household appliances" includes, but is not limited to, stoves, ovens, ranges, dishwashers, refrigerators, trash compactors, television sets, residential type garage door openers, washing machines, and clothes dryers. This classification also applies to the installation, service or repair of automated teller machines. Repair services provided by establishments subject to this classification may also include related smaller appliances such as video players, portable television sets, stereo systems, microwave and toaster ovens, blenders, coffee makers and mixers. The *servicing* of water softening systems, coffee and juice machines, and beer taps is also included in this classification.

This classification excludes dealers of new household appliances who are to be reported separately in classification 6306; installation, service, and/or repair of commercial appliances such as those used in laundries, bakeries, and restaurants which is to be reported separately in classification 0603; installation, service, and repair of commercial garage doors and openers which is to be reported separately in classification 0603; installation of water softening systems which is to be reported separately in classification 0306; and small table top or counter top appliance stores which are to be reported separately in classification 6406.

**Special note:** Classification 0607 is distinguishable from classification 6306-02 operations in that appliance stores covered in classification 6306-02 are engaged primarily in the sales of new appliances. Although classification 6306 includes repair of appliances, most repairs are related to warranty work and represent a minor part of the business. By contrast, the repair of appliances in classification 0607 is the primary activity of the business.

**0607-16 Television antenna or satellite dish: Installation, removal, service and/or repair**

Applies to establishments engaged in the installation, removal, service and/or repair of television antennas or satellite dish receiving units. Operations contemplated by this classification are limited to rooftop installation of television antennas or ground or rooftop-mounted satellite dish reception units. Establishments covered by this classification will generally employ technicians and installers to install systems and trouble shoot reception problems. Equipment is limited primarily to delivery trucks, vans, ladders, and small power and/or hand tools.

This classification excludes specialty contractors who install, remove, service or repair antennas, dish units, and/or other transmitting/receiving apparatus to a structure covered by classification 0508, who are to be reported separately in classification 0508; and establishments engaged in the sale of new console type and big screen televisions who also sell and install antennas which are to be reported separately in classification 6306.

**0607-17 Safes or vaults: Installation, removal, service and/or repair((-))**

Lock sets and/or dead bolt locks: New installation

Applies to contractors engaged in the installation, removal, service and/or repair of all types of safes or vaults regardless of size or application, private mail or postal boxes, or safe deposit box units within buildings. Safes and vaults are found in businesses such as, but not limited to, banks, jewelry stores, rare coin and stamp stores, grocery stores, and gasoline service stations, as well as in private residences. Services contemplated by this classification include, but are not limited to, safe opening services.

New installation of lock sets and/or dead bolt locks on buildings or structures by contractor or by employees of a locksmith also applies to this classification. The term new installation applies to installing a lock set (locking doorknob) or a dead bolt where none previously existed. The process consists of measuring and marking where the unit is to be placed on the door, boring holes into the door to accept the lock set or dead bolt lock, and installing the lock set unit using a power drill and basic hand tools.

This classification excludes the installation of a *replacement* lock set or dead bolt lock unit by employees of a locksmith, and locksmith store operations which are to be reported separately in classification 6309.

**0607-18 Window/door blinds, shades, curtains and drapes: Installation**

Applies to contractors and employees of store operations who are engaged in the installation of indoor or outdoor window coverings, such as, but not limited to, blinds, shades, screens, exterior roll shutters and draperies or curtains, but does not

include awnings. The process consists of marking the location of covering on the frame or opening, securing brackets or hardware, rods and poles, and installing the covering.

This classification excludes the installation of window and door awnings which is to be reported separately in the applicable classification, and the manufacture of coverings which is to be reported in the applicable classification.

**Special note:** Care should be taken when considering the assignment of a store classification to an establishment engaged in the installation of coverings to verify that a store exists. It is common for establishments subject to this classification to have show rooms to help customers visualize covering products available for sale. These establishments have little or no product available for immediate sale, as most items are special order from the manufacturer. A bona fide window/door covering store will have a large assortment of coverings, as well as related home interior products such as, but not limited to, pillows, small rugs, and accent pieces, readily available for sale to customers.

**0607-19 Advertising or merchandise display: Set up or removal within buildings by nonstore employees; staging services**

Applies to contractors engaged in the set up or removal of advertising or merchandise displays within buildings for retail or wholesale store customers. Operations contemplated by this classification will vary from seasonal panoramas with extensive carpentry, painting, and art work to dressing mannequins to be displayed in store windows.

This classification also applies to establishments engaged in providing merchandising services, not covered by another classification, (N.O.C.), without the responsibility of delivering products to the customer's place of business. Merchandising services contemplated by this classification include, but are not limited to, taking inventory of goods on hand, restocking, reordering, removing outdated or damaged merchandise from shelves, and/or assembling temporary displays.

This classification also applies to establishments providing staging services. They prepare a vacant or occupied home, showroom, or other types of property for viewing to make it appealing to prospective buyers. Usually under the direction of an interior decorator, employees will rearrange existing furniture or add accessories, eliminate clutter and depersonalize a home to make it more spacious and inviting. Staging may also be done on the exterior to provide better curb appeal, but this would generally be minimal by these firms.

This classification excludes employees of store operations engaged in setting up displays or providing staging services who are to be reported (~~separately~~) in the applicable store classification as this is a common store activity; assembly of work stations or office furniture which is to be reported in classification 2002, and merchandising establishments or employees who deliver products to their customer's place of business, and may also perform related merchandising functions, who are to be reported separately in classification 1101.

**0607-21 Meat slicer or grinder: Installation, service and/or repair**

Applies to contractors and employees of equipment manufacturers engaged in the installation service and/or repair of meat cutting, slicing, or grinding equipment within stores, restaurants, or processing plants. Repair may be performed at the customer's location or in a shop operated by an employer subject to this classification. This classification includes repair shops, field technicians, installers, and warehouse or parts department employees.

**Special note:** Establishments subject to this classification generally do not have store operations. Equipment is generally ordered from the manufacturer or distributor and shipped to the customer's location where it will be installed. In the event that an establishment subject to this classification has a store operation it is included within classification 0607.

**0607-22 Protective bumpers: Installation**

Applies to contractors engaged in the installation of protective bumpers on structures such as, but not limited to, store loading docks for freight or cargo. Operations contemplated by this classification are limited to measuring the dock to be fitted with a rubber bumper, finish cutting or otherwise fabricating the rubber pieces to fit the required application, and fastening the dock bumper with the use of hand tools. Dock bumpers are made of rubber from recycled tires or similar pliable materials.

This classification excludes the manufacture of loading dock bumpers which is to be reported separately in the applicable manufacturing classification.

**0607-23 Cellular phone systems or audio components: Installation in vehicles, service and repair**

Applies to establishments engaged in the installation of cellular phone systems and/or audio components in vehicles. Audio components include, but are not limited to, radios and stereo systems, speakers and amplifiers, alarm systems, television units, antennas, two-way radio systems. This classification applies to installation employees of stores that sell products as well as to auto service centers that specialize in the installation of products covered by this classification.

This classification excludes retail and wholesale store operations which are to be reported separately in the applicable store classification.

AMENDATORY SECTION (Amending WSR 07-01-014, filed 12/8/06, effective 12/8/06)

**WAC 296-17A-4109 Classification 4109.**

#### **4109-10 Sign painting or lettering inside buildings**

Applies to establishments engaged in sign painting or lettering inside a customer's building. This type of painting includes, but is not limited to, names, addresses and office hours on a door or window, and signs in the form of lettering/illustrations on an interior wall. Work contemplated by this classification includes preparing the surface by cleaning, sanding, etc., applying the lettering/illustrations by appropriate method (brushing, rolling, spraying, etc.), and applying a protective finish. This classification includes the painting of scenery, by a contractor, in a shop or theater (if done by the employees of a theater or television broadcasting station it would be an inclusion in classification 4504 or 4502 as applicable), and the painting of an interior mural.

This classification excludes sign painting shops that paint on, or apply vinyl lettering to, precut backings which are to be reported separately in classification 4109-18; painting in a shop that is not covered by another classification which is to be reported separately in classification 3603-12; and the painting, repair or erection of signs or murals on any part of the exterior of a building which is to be reported separately in classification 0403.

#### **4109-18 Sign painting in shop**

Applies to establishments engaged in providing sign painting services in their shop. The use of this classification is limited to painting on, or applying vinyl lettering to, precut mediums (sign backings) provided by the customer or purchased elsewhere; it does not contemplate the manufacture of the sign backing. (Vinyl lettering or designs are usually computerized. Lettering or designs are entered into a computer; a plotter/cutter attached to the computer cuts the programmed design or lettering from rolls of vinyl.) Work contemplated by this classification includes preparing the surface by cleaning, sanding, etc., applying the lettering/illustrations by appropriate method (such as brushing, rolling, spraying, applying vinyl designs), and applying a protective finish. This classification includes making and applying vinyl lettering in place of painted lettering and lettering/illustrating on vehicles not in connection with auto body repair or painting.

This classification excludes the painting or lettering of signs in buildings which is to be reported separately in classification 4109-10; painting in a shop which is to be reported separately in classification 3603 (unless the painting is included in another classification); the painting, repair or erection of signs on any part of the exterior of a building which is to be reported separately in classification 0403; and sign painting in connection with sign manufacturing operations which is to be reported separately in the applicable manufacturing classification.

**Special note:** An employee who creates vinyl lettering or designs on computerized equipment in an office environment, and is not involved in the further manufacturing of signs, could qualify for class 4904 provided that all the conditions of WAC 296-17-31018

are met.
