

# Fish net handle holder / support

## Description

Low cost, custom-made holder of a net handle. The net holds about 50 to 70 pounds of fish. The weight of the net with fish is held for several minutes. Using the handle holder may reduce forceful gripping. It also may help in reducing prolonged muscle use of the arms and lower back.

*Holes drilled in a pvc pipe for rope attachment. The PVC pipe holder hangs from an upper structure. The frame of the net rests on the hatch opening.*
