3. Some or all of the following components:

- A steel frame that supports the floor.
- A data plate on the interior of the home that contains the name and address of the manufacturer as well as a statement that, "our manufactured home is designed to comply with..." as well as other information. It is usually located near the main electrical panel box, in the laundry area, inside a closet, on a cabinet door in the bathroom, laundry room, or kitchen.
- A heat loss certificate that specifies the heating zone for which the home was designed as well as other data pertaining to the home.
- A serial number will have been stamped on the front metal crossmember.
- A title that was issued by the Dept. of Licensing.
- The furnace and water heater have markings on them specifying that they may be used in manufactured/mobile homes.
- The main electrical panel box has four (4) wires coming into it.
- The electric range and electric dryer have four (4) connection points.
- Labels would be applied on the exterior walls near each of the services (i.e. – water inlet, electrical inlet, sewer drain).

If your home has any of these items, it is a manufactured/mobile home and requires inspections for all alterations by the Department of Labor and Industries Factory Assembled Structures Section. Please see your local phone book for the nearest L & I office.
