

APPROVED ELECTRICAL CONSTRUCTION TRADE TRAINING SCHOOLS

RCW 19.28.191 – WAC 296-46B-971

Upon completion of an approved electrical construction trade training school program, the graduate is given credit for part of the “supervised work experience hours” necessary (limited to a maximum of 50%) to qualify for a specific electrician certification examination. Each training program may be applied to only one specific specialty.

Students must maintain a valid **Electrical Training Certificate** issued by the Department of Labor and Industries during their entire enrollment. Training certificates are available [online](#). The training program director may credit actively enrolled students with the mandatory hours of basic classroom electrical training necessary to renew a training certificate.
