

Crane Certification and Permit Management System

Viewing Your Tower Crane Permit

These steps explain the “Manage My Permit” screen. This screen allows you to see details of permit actions associated with your business entity. You can view details for a particular crane, and download a permit PDF in order to view, save, and/or print it.

From your Home screen, click on Manage My Permit:

The **Manage My Permit** screen is displayed.

- To view crane information: Click on the Crane # link in a given column. A pop-out screen with current information in the system for that crane will be displayed.

Jib Length	100	Counter Jib Length	100
Counter Weight	100	Non-Standard Base Flag	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

- To download your permit PDF: Click the “Print” link in the Print column to download the PDF document. You can then access the downloaded PDF on your computer. In some cases, a “Downloads” pop-up will display at the top right corner of your browser. In other cases, you may need to access the download in a different manner. ****Note: This looks slightly different depending on the web browser you are using and possibly based on your browser settings.**

You can now save the downloaded document to your device, and/or print it.

Note: The ‘Print’ link will only be available for Assembly actions which are in “Active” status.

- Reconfiguration or Disassembly actions do not receive separate permits. Rather, those are linked to the original Assembly permit.
- Assembly permit actions which are not “Active” will not have permit PDFs available to download.
