

# Janitorial Safety Tip Sheet

A series of health and safety tips to prevent work-related injuries in the janitorial industry

## Unlabeled chemicals can be dangerous!

Spring 2024

- The manufacturer's original container with product label is best – if it's in good condition (replace any containers that are cracked or missing parts)
  - Check with the chemical manufacturer for spray bottle requirements
- If you must use another container—avoid ones commonly used for drinking
- Label the new container—use the chemical name and any hazard information from the original packaging
  - Use universal hazard symbols
  - Adding warning labels in other languages may also be needed
