Hello,

I just want to give a comment on the ambient heat rulemaking, from what I can see is some of us will have to go out of business from taking breaks all day long, we don't get paid enough in construction to sit around that long. We don't get to print money like the government, so please get out of our way.

I believe the government needs to leave us alone and let the babies work at Burger King if they can't take the heat and let us do what we need to do to earn a living in Freedom! If we choose to over heat it's not your problem. Killing babies is ok in this country but can't freely choose to work long days in the heat if we want. Totally ridiculous!

--

Thank You
